**ROBOTIC END-OF-ARM TOOLING**  
CATALOG

## Corporate Mission

SAS Automation is one of the world's largest suppliers of modular component-based Robotic End-of-Arm (EOAT) and gripper systems. Providing tooling solutions that allow your robot to do more, and you to do less is our primary business. Unlike others, we are specialists when it comes to end effector gripper systems for all makes of robots used in the manufacturing, packaging and plastic injection molding industries.

Our tooling systems and automation equipment are installed throughout the world in a wide variety of applications. We take pride in presenting them to you as references.

**SAS**  
AUTOMATION

ROBOTIC END-OF-ARM TOOLING

ISO 9001 Quality System Certified

## Global

SAS continues to expand and support our customers on a worldwide basis. Our US, European, and Asian facilities have increased inventory for better component selection as well as faster delivery. Several sales agents have been added to serve customers in North America, Europe, Asia and the Pacific Rim. This translates into better service and efficiencies for our customers.

## Quality Products and Services

SAS Automation meets or exceeds customer expectations by providing superior Robotic End-of-Arm Tooling and Automation Technology. Together with our customers and suppliers, we continuously improve our products and services to assure market leadership.

## Benefits

- + ISO 9001 Quality System Certified (US, DE)
- + In-house Engineering, Manufacturing and Testing
- + Online purchasing at our e-commerce site
- + Delivery - next day on components
- + Custom designed End-of-Arm Tooling
- + Custom designed and manufactured components
- + Custom Automation Equipment
- + On-site Sales, Installation, Training and Service - worldwide
- + End-of-Arm Tooling for all robots
- + One-stop supplier for Robotic End-of-Arm Tools
- + Robotic Laboratory and End-of-Arm Tooling Training Facility

## End-Of-Arm Tooling

Robotergreifer (EOAT) und Greiferanwendungen

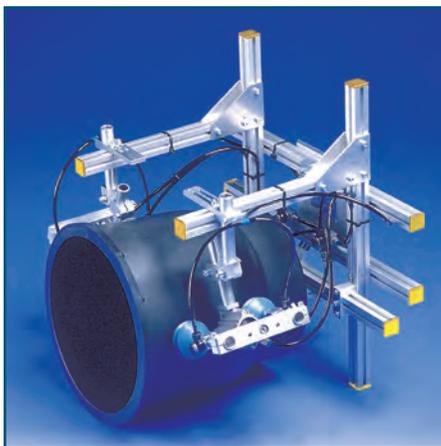

### Your Robot is Only as Good as its End-of-Arm Tool.

Modular gripper components

In relation to an entire automation project, the End-of-Arm Tool (EOAT) is one of the most critical and dynamic aspects.

When it comes to building a correctly functioning robotic EOAT gripper, SAS offers can supply the information to enable you to make the most of your time, money, and effort.

Assembled modular EOAT gripper

#### The characteristics of an effective End-of-Arm Tool:

- Lightweight – reduces robot wear and maintenance
- Rigid – consistent in location; maintains product securely
- Durable – long life; low maintenance
- Modular – easy to adjust and to make changes
- Availability – quick delivery of components and spare parts

Build your own EOAT with SAS standard modular lightweight components or have the experienced Engineers and Technicians at SAS design and build your EOAT.

**SAS provides you with everything necessary to reduce that “Small Stuff” hassle!**

For ordering and technical assistance, contact one of our friendly sales staff or representatives.

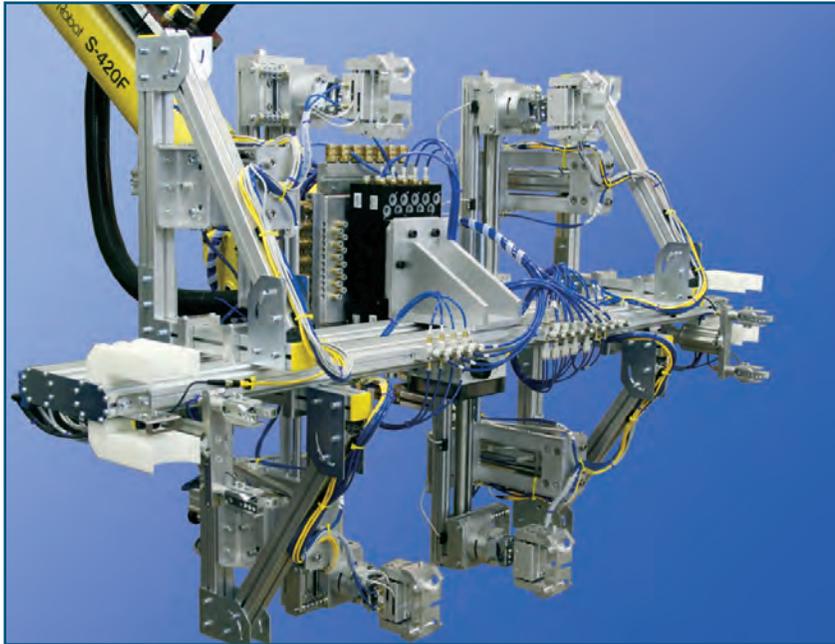

Or order anytime by shopping online at our e-commerce site.

Programmable Gripper EOAT

## Custom End-of-Arm Tooling

Robotergreifer (EOAT) und Greiferanwendungen

Dual Purpose Insert Placement & Part Gripper EOAT

Miniature Part Placement Tool

### Step 1... Part Application

Step 1: Teil Beschreibung

ステップ 1: 申し込み

- Specify your part to be gripped and/or application as well as robotic information, including payload and mechanical/electrical interfaces, by providing part/mold drawings, video of process, and sample parts.

### Step 2... Custom CAD Design

Step 2: Entwurf & CAD

ステップ 2: デザイン及びCAD

- We custom design to your specifications and provide CAD drawings for approval.

### Step 3... Gripper Assembly

Step 3: Greifer Zusammenbau

ステップ 3: 製作

- Upon approval, we will layout and assemble your EOAT with standard and/or custom machined components.

### Step 4... Testing

Step 4: Funktionstest

ステップ 4: テスト

- Finally, we test the custom EOAT with your part/application to facilitate quick set-up on-site.

### Step 5... Installation

Step 5: Installation

ステップ 5: 設置

- Upon request, we provide technicians for installation assistance, on-site adjustments, and robot interfacing.

### Step 6... Support

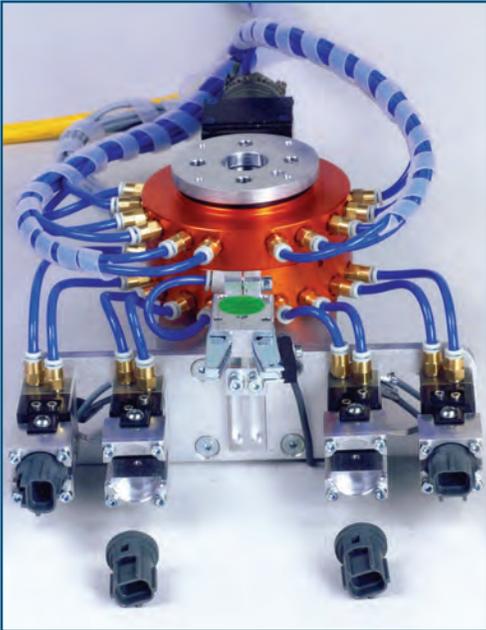

Step 6: Instandhaltung

ステップ 6: サポート

- As an option, we offer a recommended spare parts kit to assure maximum production of your robotic work cell.

## Custom End-of-Arm Tooling

Robotergreifer (EOAT) und Greiferanwendungen

Custom EOAT for electrical plugs utilizes parallel grippers with custom manufactured jaws and a hands free quick change chuck.

Rotary Degate Station reduces number of cutters and blades needed.

Unlike the others, SAS is a leader in the design and manufacturing of custom Robotic End-of-Arm Tooling. With our engineering and manufacturing facilities in the same location, we have the expertise and materials to develop custom grippers that ensure your robot handles your part in a repeatable fashion the first time, every time. SAS builds custom grippers for any part, any robot, anywhere.

Automotive Instrument Trim Panel EOAT Gripper

Here's just one example, of how our experienced design and engineering department designed a complex tool that increased productivity in the production of an Automotive Trim Cover:

### Project Objective:

Provide End-of-Arm Tooling to: (1) Remove 4 parts from mold without marring any surface or deforming the parts. The parts had to be cosmetically perfect. (2) Reduce overall cycle time.

### Results:

*"Not only did SAS Automation design and build end of arm tooling that accomplished the objectives, but it increased my productivity by 30%. The process was easy and efficient. I contacted my local SAS representative who came to our facility, took digital photos, and obtained mold drawings and samples. The engineers at SAS performed the design and sent drawings to me for approval. After my approval, the finished product arrived over a week ahead of schedule. The product design and execution was excellent, and their field installation service was phenomenal! It has now been running flawlessly for over 6 months..... I will definitely be using SAS for future projects!"*

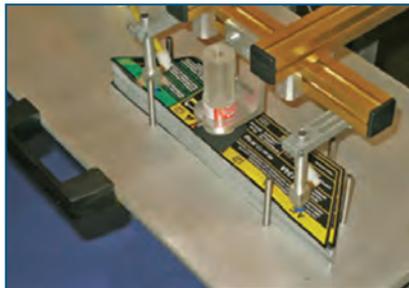

*-a direct quote from this prominent manufacturing company*

## Insert Molding & In-Mold Labeling (IML)

Insert Molding and In-Mold Labeling are two of the most difficult tasks for either an operator or an EOAT to perform.

Insert Molding is the process of placing small parts into a mold that then become part of the finished product. The robot must be able to assure proper placement and alignment of the inserts. Our experience designing EOAT for insert placement have made the process second nature to us, regardless of complexity or size.

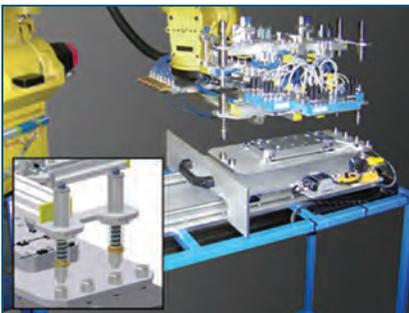

IML is the process of placing labels into the mold so that they become part of the finished product. We have developed and patented a process for IML that does not require mechanical gripping of the label by the tool or in the mold, leaving a much cleaner surface on the finished part.

IML processes are increasingly popular because of their labor saving benefits. But equally important is their ability to produce a better part - with more accurately placed labels that adhere permanently.

### Advantages of In-Mold Labeling

- Robot handles the process
- Accurate label placement
- Reduced waste
- Constant cycle times
- Label becomes part of the finished part - does not rely on adhesive
- No edge to peel back for fingers to remove.

The SAS patented (U.S. P at. #6,416,706) Insert Mold System can be applied to other parts including metal inserts, cloth, and vinyl. Our EOAT makes your parts better with accurate placement of a permanent label at less cost with reduced waste and labor.

### Spring-loaded Docking Pins for insert molding applications (IML).

In addition to requiring precise accuracy, insert molding applications are often performing several processes at the same time. Docking pins provide the assurance required in complex and low tolerance applications.

#### Significant Features:

- Provides accuracy of +/- .02 inches
- Sized to fit your End-of-Arm Tool, robot and mold
- Pins can dock on existing mold locators
- Custom lengths, strokes and diameters available.

## Degating and Cutting Solutions

The SAS complete line of pneumatic cutters and degating systems includes knives, nippers, blades, sprue cutters, and CNC degaters for any plastics application. Handheld and automatic cutters are available.

With the widest variety of lightweight cutting tools, you can easily select the tool that best meets your production challenges. Cutting blades can be easily rotated for left or right-handed operation, and all units are easily maintained. Many styles and sizes of blades are available to suit your application..

### Work Knife

SAS Work Finisher is a safe, ceramic knife that deburs hard plastics effortlessly without fear of cutting hands/fingers. It is ideal for curved and complicated shapes.

### Hand-held Pneumatic Cutter

The MR Sprue Cutters with H in the part number are hand held cutters. The SAS Nip It! line of sprue cutters are hand operated, feature safety levers, and can be fixture mounted. This line features many standard and special blades. See Nip-It! section for Type-I blade information.

### Static Knife Cutter

Whether mounted to an articulating robot, statically, or directly to your End-of-Arm Tool, this economical and lightweight precision cutting tool provides accurate, low cost cutting for a multitude of fan degating applications. The SAS Static Cutter includes a standard box cutter knife, protected by a safety guard, attached to an adjustable SAS elbow arm. The knife blade can easily be replaced by a simple turn of a locking handle.

## Degating and Cutting Solutions

Filmanguss- und Anguss-schneid- Lösungen  
ドボック 鋸スリノックのめい

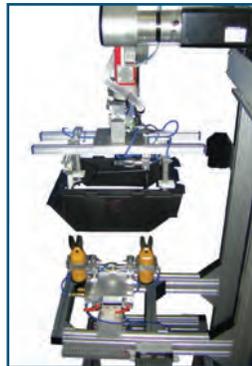

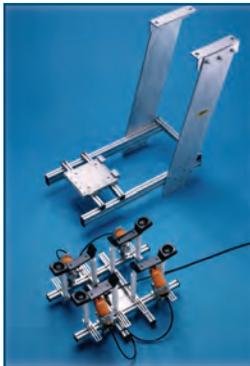

### Fan Gate Trimmer

This Fan Gate Trimmer cuts longer and harder to cut fan / edge gates with +/- 0.4 mm vestige tolerance. The parts are held firmly in place by a custom designed part nest made to contour the part and hold it securely. The custom blade assemblies are also uniquely designed to contour the part/ gate interface.

### Lift Degater

SAS Lift Degater was designed for large plastics parts. A robot transports the part to the Lift Degater and sets the part into the “part conforming nests”, located at the top of the degater. The part is then trimmed by several precisely positioned cutting tools that match the nests. Precision and speed are coupled with several simultaneous cutting actions. The waste trim is then dropped into a container and the finished product is lowered on to the lift table. Then, the product can be removed by a packer, who is protected from the lift by a safety light curtain.

### Robot Beam Mounted Degaters (rotation option)

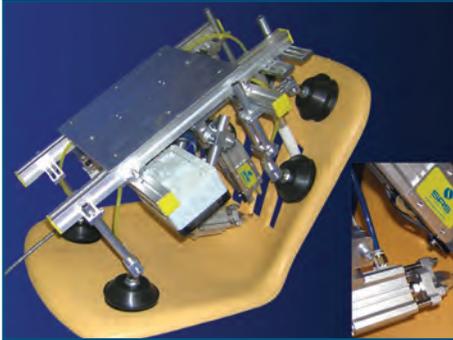

The SAS adjustable Rotational Degater can be set as desired for dual service applications around 360 degrees. This application is especially suited for cutting multiple gates on different plastic surfaces, rotating both quickly and accurately around a part. This degater can be mounted on any robot beam. For both ease of use and fast changeovers, it can also be mounted on a quick change chuck with one-touch air fittings and be fitted with a variety of pneumatic degating tools, including a MR-50A capable of cutting plastic up to ½ inch (12 mm) in diameter.

### Custom Degaters

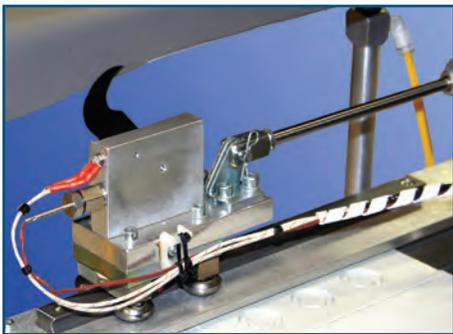

SAS engineers use 2D and 3D CAD tools to create custom equipment that will perform operations quickly and safely. Every station is designed to increase productivity, ensure the safety of the operator, and reduce operator fatigue. SAS has tremendous experience developing special degating systems for very large as well as small and delicate parts.

## Degating and Cutting Solutions

### EOAT mounted cutters

Get more out of your EOAT by adding the degating function to your custom tool. The SAS engineers can analyze your operation to determine the most cost efficient degating method for your part.

### Rail Degaters

Compact, modular degating system for fan gates that greatly reduces finishing labor costs and provides a consistent clean cut for fan gates. Mounted on a rigid frame, this degating unit can be designed to trim either straight or curved fan gates. Radiuses as small as one inch (25.4 mm) can be cleanly degated by this system.

### Punch Press Degater

Punch presses are used when the cutting vestige requirements are critical and range between 0.003 and 0.010 in. The SAS Punch Press can be operated manually or automatically and can be integrated to the robot or press. Punch press degaters uniquely provide a preferred 'flush' cut.

### Thrust Cutter

This thrust cutter is designed with a razor sharp blade positioned at a 45 degree angle to precisely shear a sprue gate in narrow places. This cutter holds the blade on a special cylinder to precisely actuate the gate cutting process. The cylinder can be mounted in many angles. This style of gate cutting uniquely allows access to very hard to reach areas.

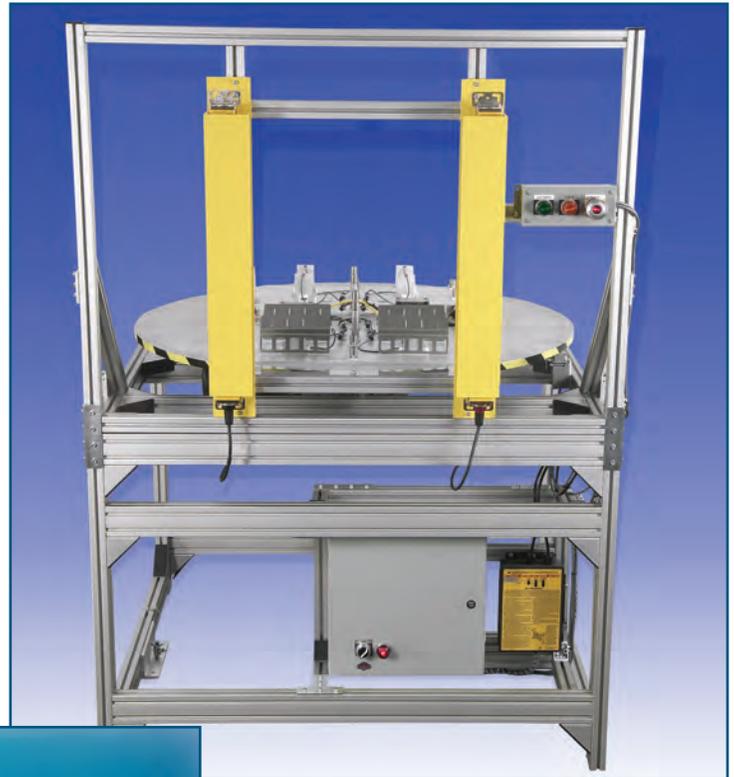

## Custom Workstations & Automation Equipment

Arbeitsplatz & Automatisierung  
空カップグリッパ/スプルー

In addition to Robotic End-of-Arm Tooling SAS Automation also produces custom workstations and automation equipment.

- Punch Press Degaters for precision cutting of fan gates.
- Degating Fixtures for cold runner degating.
- Knife Degaters for degating long edge gates.
- Rotary tables, lift tables, and shuttle tables for loading and unloading parts and inserts.
- Chute fixtures for part separation and collection.

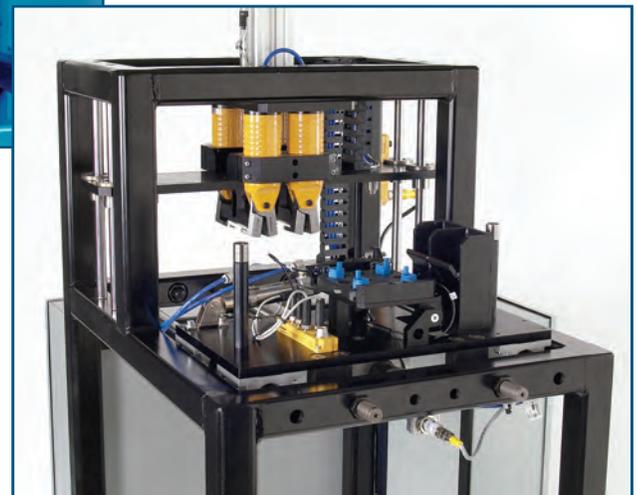

Workstations can be designed to perform multiple functions on the part at a time.

Rotary Indexing Table

Punch Press Degater

Degater Station

## Get a Grip!

### Gripper Handling Solutions

If your automation cell requires a palletizing End-of-Arm Tool, our custom robotic solutions allow your robot to do more. Our EOATs are available in 4 styles:

- Bag Gripping
- Vacuum Plate
- Carton Clamping
- Fork-style for open top cartons and large bags

For more information about the ABG-25 & ABG-50, and the FBG-25 & FBG-50 Bag Grippers from SAS Automation.

### Bag Grippers – Adjustable!

The SAS ABG-50 Adjustable Bag Gripper is ideal for palletizing plastic, woven cloth or paper bags containing grains, chemicals, dog food, minerals, etc. A hand wheel driven lead screw quickly changes the ABG-50 for different bag widths while the optional servo drive adjusts the width on the fly to accommodate mixed loads.

### Vacuum Technology

SAS provides Vacuum Plate End-of-Arm Tools to palletize single containers and even complete pallet layers. These EOATs are powered by vacuum turbines or venturi generators and provide superior gripping capabilities by using high vacuum flow. Valved vacuum ports automatically close when there are gaps between the products or the product is not present. The vacuum plates can also be zoned for multiple pick and place.

## EOAT For Packaging And Palletizing

SAS addresses the challenges faced by packaging processors providing a variety of options with our modular robotic EOAT systems.

From lifting 250 pound metal wheel hubs to inserting small electrical parts before packaging, an SAS custom EOAT can satisfy all of your manufacturing needs.

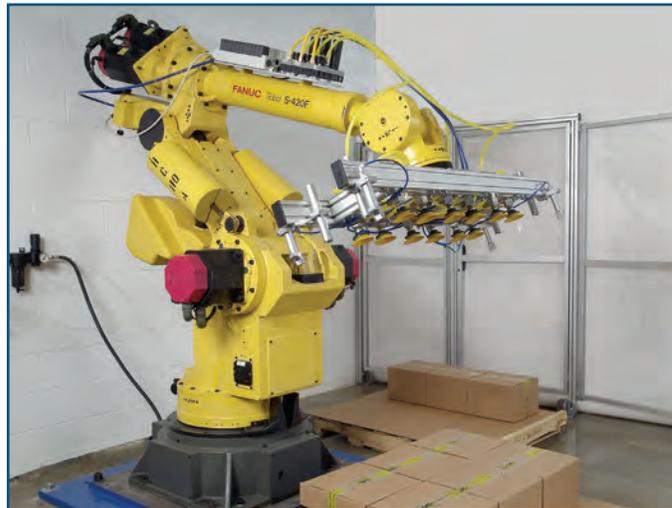

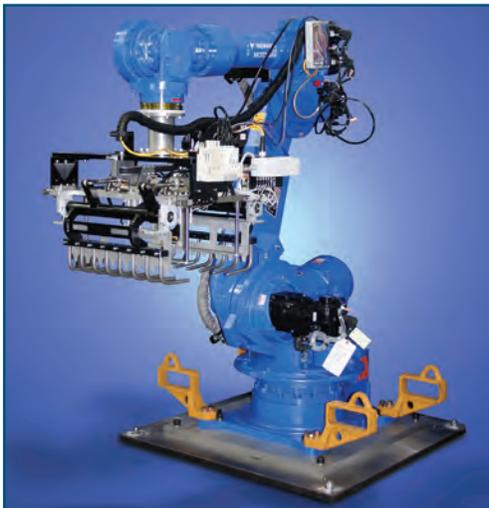

Cost effective, multipurpose End-of-Arm tools can be fabricated to pick up and locate pallets, as well as place cartons of various shapes on the pallet without changing the EOAT.

**Other SAS packaging applications and benefits include:**

**Inserting slip sheets**

**Handling porous surfaces**

**Built-in air cylinders to stabilize loads for rapid movement**

## EOAT for Packaging

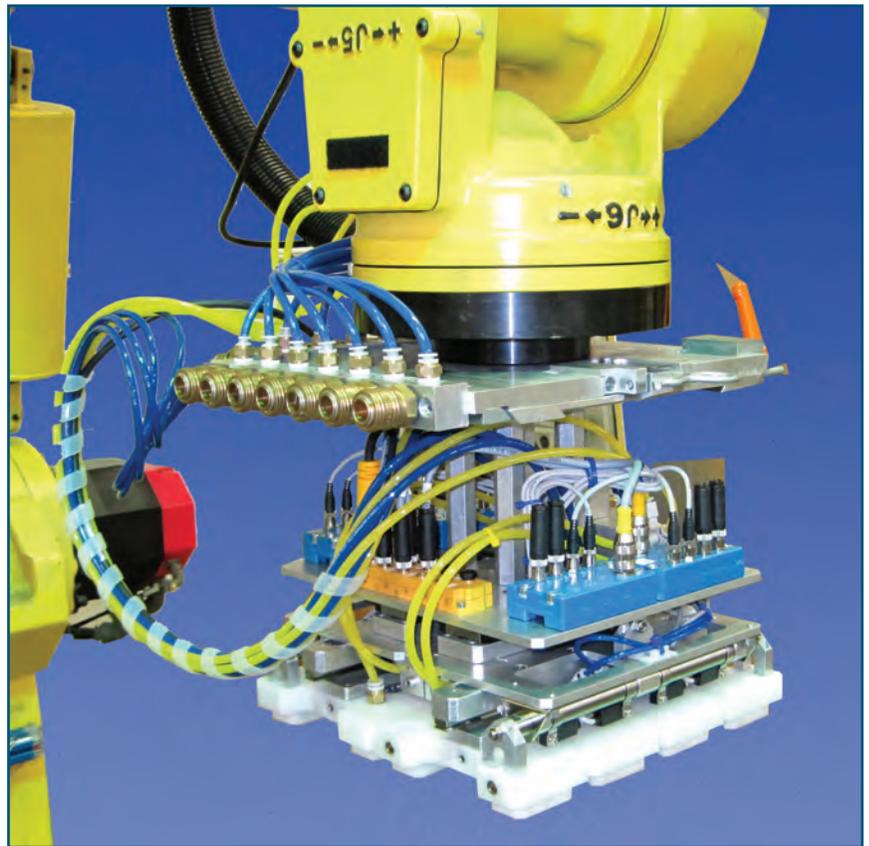

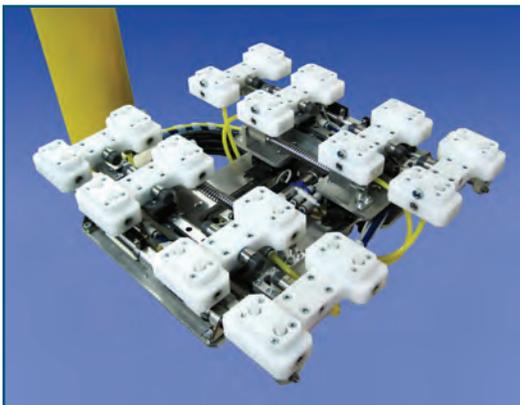

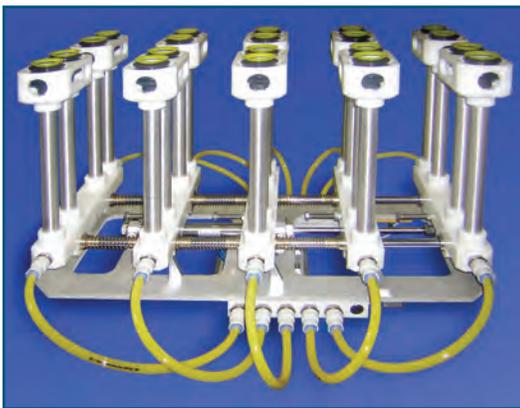

SAS addresses the challenges faced by packaging processors providing a variety of options with our modular robotic EOAT systems.

From lifting 250 pound metal wheel hubs to inserting small electrical parts before packaging, an SAS custom EOAT can satisfy all of your manufacturing needs.

Cost effective, multipurpose End-of-Arm Tools can be fabricated to pick up and locate pallets, as well as place cartons of various shapes on the pallet without changing the EOAT.

STD: Standard SS: Slip Sheet PH: Pallet Hook

## ABG/FBG-25

### Standard ABG-25 components:

- Rugged 12.7 mm (1/2 inch) thick aluminum main mounting plate
- Heavy-duty rails and bearings with double seals and grease ports
- Hand wheel, opposing thread lead screw, bearing blocks and shaft locks
- Solid stainless steel gripper fingers, radiused ends, 11.1mm (7/16 inch) diameter
- Adjustable and independent decking plates Adjustable decking plates are independent of gripper fingers
- Top-mounted, bag clamps
- High-flow pneumatic solenoid valves
- Ultrasonic bag presence sensor
- Custom mounting plate to accommodate any robot

### Slip Sheet option includes:

- 3 or 4 stroking pneumatic cylinders
- 3 or 4 corrugated rated vacuum cups
- 2 additional pneumatic solenoid valves
- 1 PIAB COAX vacuum generator with vacuum confirmation switch

### Valve Package options:

- Discrete I/O
- DeviceNet
- Ethernet
- Custom

Systems Integrators: Please call us for Integrator Pricing

## ABG/FBG-50

### Standard ABG-50 components

- Rugged 19 mm (3/4 inch) thick aluminum main mounting plate
- Heavy-duty rails and bearings with double seals and grease ports
- Hand wheel, opposing thread lead screw, bearing blocks and shaft locks
- Solid stainless steel Gripper Fingers, radiused ends, (15.9 mm) 5/8 inch diameter
- Adjustable and independent Decking Plates
- Top-mounted, Gripper Plates
- High-flow pneumatic solenoid valves
- Ultrasonic bag presence sensor
- Custom adaptor plate to accommodate any robot

### Pallet Hook option includes:

- 4 rotating pallet hooks
- 2 rotating shafts with 4 bearings
- 1 connection / timing linkage
- 1 stroking pneumatic cylinder
- 1 additional pneumatic solenoid valve
- 1 ultra-sonic pallet presence sensor

### Valve Package options:

- Discrete I/O
- DeviceNet
- Ethernet
- Custom

### Slip Sheet option includes:

- 3 or 4 stroking pneumatic cylinders
- 3 or 4 corrugated rated vacuum cups
- 2 additional pneumatic solenoid valves
- 1 PIAB COAX vacuum generator with vacuum confirmation switch

Systems Integrators: Please call us for Integrator Pricing

### Clamping EOATs

Side clamp EOATs work particularly well for slip-top cartons as well as heavy weight applications where a topside pick is not possible; such as 40 lb. blocks of cheese in glued-up corrugated cartons. The clamping cylinders are programmable for the amount of force applied to the carton. This also allows for multiple sizes of cartons to be palletized with the same EOAT. An optional slip sheet system is also available.

### Fork-style EOATs

Retracting Fork-style EOATs are particularly suited for open-top containers and over-sized bags that must be picked from the bottom. The stroking forks are designed to pick product from a roller conveyor. The forks retract through a stationary stripper plate and the product is placed on the pallet. A slip sheet option is available and the forks can also be used to pick and place a shipping pallet.

## Vacuum Handling Systems

Vakuum-Handling-Systeme

This new heavy-duty vacuum handling system is a universal tooling system, designed to safely handle products, parts, pallets, packaging, and slipsheets of varying dimensions.

Like many of the modular systems from SAS – this line is easy to configure to your specific part. It easily handles parts that are often difficult for standard grippers, including porous, soft, twisted, round, flexible and other non-standard shapes, weights, and materials.

This comprehensive system is highly suitable for larger, higher capacity gripper surfaces and lower vacuum levels, allowing it to overcome many of the shortcomings of standard vacuum solutions. It is the easiest and most reliable way to handle bulky and heavy parts, while ensuring that no part is damaged. Each gripper has

one valve that is auto-regulated to open and close. Gripping power uniquely remains constant offering exceptional handling with improved lifting, and the system does not need any adjustment – thereby lowering labor and maintenance costs. It is unaffected by sawdust, humidity, or surfaces that are molded, rough, or twisted. We know of no surface that cannot be used with this system.

### Significant Features:

- Easy and reliable; requires minimal maintenance
- Fast installation
- Lightweight, multi-purpose, and compact
- Independent and auto-regulated valve system
- Will not damage parts
- Handling capacity 3000kg/m<sup>2</sup> (614 lbs/ft<sup>2</sup>)
- Adjustable systems available
- Able to handle a wide variety of shapes
- Multiple heads configured in series only require one turbine

- Many options available – to handle any part

### Power Consumption:

Electric Turbine – in release position, power consumption is approximately 30% of normal

Compressed air - Venturi power consumption only in pick-up mode

## Industries: General Material Handling

### Boom-type Robots

For boom-type mounting of robots, the tool side bayonet chucks are offered that clamp directly onto the 40 or 60mm OD. A bayonet is also offered with SAS's unique D shape frame profile, having 6 mounting surfaces and 7 nut channels.

### Press Tending Applications

In some press tending applications, vacuum cups on spring compliance mounting arms are necessary, especially when gripping from a flat steel stack to load the stamping die to a formed part removal mode. In this case, simple placement of the spring loaded cups may be adequate; whereas other more complex applications may require indexing or movable end effector configurations that are different for die loading and unloading after the part is stamped and formed in the production line.

### Safety Hold Down Clamps

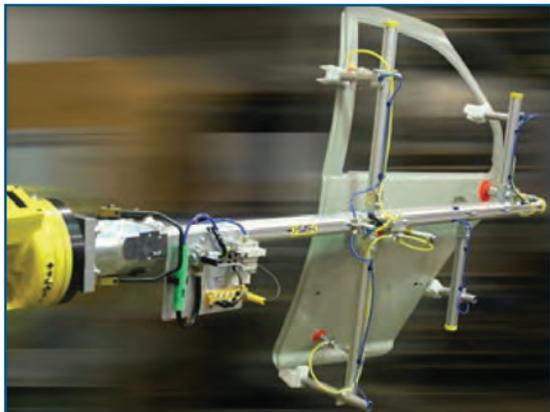

For high speed, high weight load applications, or a high level of man machine interface – where safety is an issue (an automotive assembly line), SAS's GRF Gripper Finger Clamps (safety hold down clamps) are recommended. These are available with protective guides (ZTS) as well as an adjustable back-up stop (ANF). For a fail safe operation, a check valve can be added to ensure that the hold down clamp will continue to grip the part in the event the compressed air supply drops out momentarily or completely fails.

Whatever your application, the SAS team is ready to provide superior end effector solutions in a timely, cost effective manner, assuring customers obtain ultimate value and service for your production operation.

"The HX's flexibility and adjustability is ideal where 5+ axis robots are used in multi task applications. Recent successful 5+ axis robot applications have made possible with SAS's HX Hybrid profile system which allows boom end mounting to take advantage of the greater range of applications with these types of robots such as part trimming, deflashing, and other post mold operations, including assembly and packaging," said Trent Fisher, President of SAS Automation. "Additionally, it's interchangeability with all of SAS's modular EOAT line of components makes this one of our premier profiles," he added.

## Industries: General Material Handling

### Hybrid “HX” End Effectors for 5+ Axis Robots

SAS Automation recently introduced new Hybrid “HX” End Effectors for 5+ Axis Robots, made exclusively with the newly developed SAS HX hybrid frame profiles and modular off the shelf gripper components.

This HX profile line is ideal for 5+ axis robots in multi-task, high-speed, heavy weight, or press tending applications.

This new HX End Effector is specifically designed for increased flexibility, offering an optimal “hybrid” design that includes the benefits of tubular frame adjustability as well as extruded

channel frame profile rigidity. Robotic production use includes long reach boom press tending applications, heavy-duty material handling, or multi-task applications.

#### Significant features and benefits:

1. Direct side channel mounting of standard SAS gripper component hardware, eliminating rotation or twist problems.
2. Modular design allows for side mounting or circumference component or connector clamping, offering added compatibility to other brands and types of systems.
3. Available with compliant oil resistant vacuum cups as well as safety hold down clamps to secure parts even when system fails.
4. Available in sizes of 40mm and 60mm OD, (HX-40/HX-60).
5. Center hole can be tapped to accommodate an M8 sized screw for connection of end plates/caps, connectors, etc.

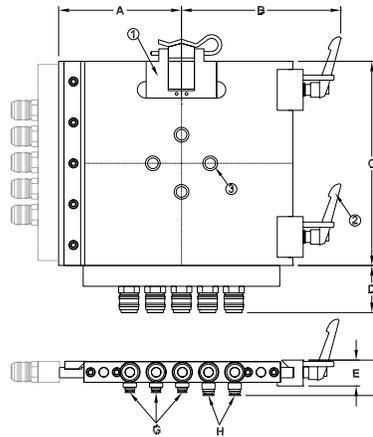

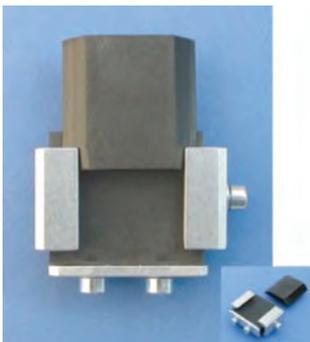

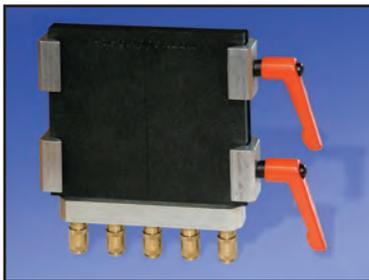

This HX line was designed to used with SAS GWP-X and PL-X channel nut profiles. The HX's flexibility and adjustability allows for better routing of pneumatic hoses and electrical sensor wires to grippers and suction cups as well as many other necessary applications.

Several connectors EVC and EVH are recommended for the HX profile when connecting in a rigid, perpendicular configuration. The EVC allows for connection of cross connections when the same frame size profile are used; whereas the EVH is used when a smaller cross connector step down in frame profile size, from the larger one.

# SWM... Quick Change Mounting Chuck

SWM... Schnellwechselsystem  
SWM...チャック取付クイックチェンジャー

- Adaptable to every robot
- Economical one-time investment per robot
- Makes EOAT interchangeable between robots
- Minimizes downtime during setup changes
- EOAT Gripper stays aligned & secure
- Integrated pneumatic quick disconnect system
- Lightweight aluminum base plates for standard applications
- An auxiliary manifold can be attached to the side of the chuck to provide additional pneumatic quick disconnect ports.

### E-Type (Economy)

- Mounting chuck without pneumatic fittings for cost savings and weight reduction
- Best used when pneumatic connectors from robot are near to the EOAT or when EOAT may be close to the robot payload.

### ST-Type (Steel)

- Steel chuck body with zinc plating for heavy duty applications
- Steel mounting plates also available

### LT-Type (Light)

- Delrin chuck body for reduced weight on small size chucks
- Great for light applications and small robots
- Delrin mounting plates also available

New Quick Change Chuck SWM-LT is part of the SAS New Technology series of lightweight line of components

- The new Quick Change Chuck-Lite is adaptable to every robot, and is an economical, one-time investment per robot.
- New SWM-LT are manufactured for all ranges of part sizes. This new lightweight component offers average weight savings of 50% - 60%.

\*SAS Automation will match any competitor's price for stock components with proper verification.

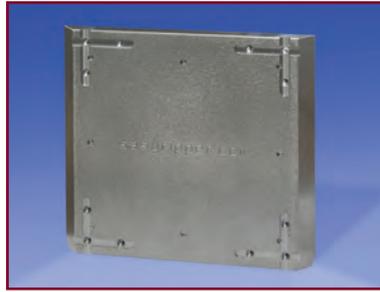

GPM... Quick Change Mounting Plates

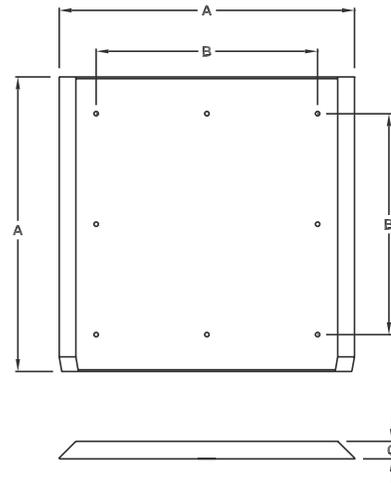

GPM... Greifergrundplatte  
GPM... チャック取付プレート

Standard

T Type

- Available in standard or X-Type, as above, upon request
- Low cost dove-tail mounting plate for grippers
- Can be used with or without SWM Quick Change Chuck
- Lightweight aluminum plates for standard applications

L-Type

- Pre-drilled with M4 threaded holes
- Usually used with L-18/10 profile

X-Type

- Pre-set for mounting profile
- X plates pre-drilled for 5mm cap screws and include 6 screws, lock washers, and GWP 5X channel nuts

ST-Type (Steel)

- Recommended for use only with steel SWM plates
- Use with steel SWM plates for heavy duty applications

LT-Type (Light)

- Can be used for light tools with any SWM plate of same size
- Use with LT SWM plates for greatest weight reduction in light duty applications
- Available in C & X styles as above on request

T-Type (Tubing)

- Used with tube style framework
- Has tapped holes for KVB clamps

| Standard | A   | B   | C  | SWM Chuck | Weight (g) | Material | Price   |

## SWM...SA Semi-Automatic Quick Change Mounting Chuck

SWM...SA halbbautomatische Schnellwechselflatte  
SWM...SA 半自動クイック・チェンジ取付プレート

- All the benefits of SWM Quick Change Mounting Chuck
- No need for hose clearance below the chuck
- Automatically couples air and vacuum lines
- Must be used with GPM SA mounting plates
- Uses "S" style fittings (not included)

- ① - Rubber seals for pneumatic interface
- ② - Hand levers for changing EOATs without tools

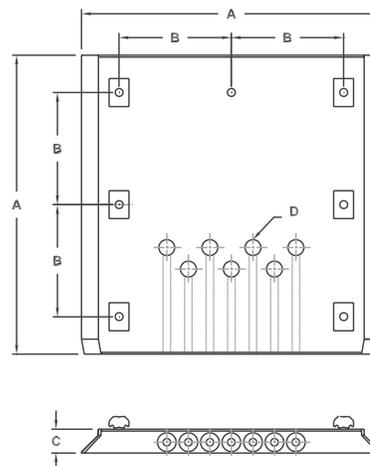

|                 | A   | B   | C   | D  | E  | F  | G (Tubing Size) | # of Ports | GPM Plate | Weight (g) | Price    |

| <b>GPM 3 SA</b> | 250 | 100 | 13 | G 1/8" | 10         | SWM 3 SA  | 2046       | \$165.00 |

## GPG... Spring Loaded Quick Change Mounting Plates

GPG... Greifergrundplatte  
gefedert mit Kugelumlaufbuchsen

GPG... スプリング式プレート

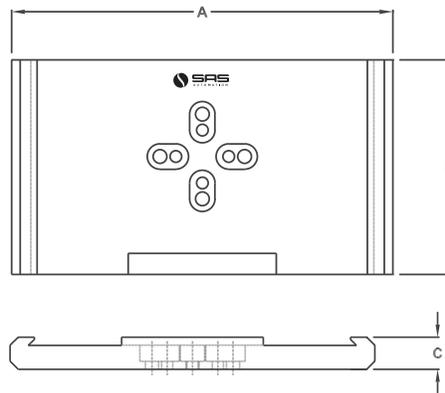

- Allows for a spring loaded compliance on our standard GPM mounting plate
- Especially useful in high speed ejection strokes and safety releases

|              | A   | B   | C   | D   | E   | F  | G (Stroke) | SWM Chuck | Profile | Weight (g) | Price    |
|--------------|-----|-----|-----|-----|-----|----|------------|-----------|---------|------------|----------|
| <b>GPG 1</b> | 100 | 35  | 102 | 70  | 91  | 66 | 20         | SWM 1     | LX      | 601        | \$295.00 |
| <b>GPG 2</b> | 160 | 60  | 160 | 120 | 115 | 84 | 30         | SWM 2     | X       | 253        | \$213.52 |
| <b>GPG 3</b> | 250 | 100 | 254 | 200 | 115 | 84 | 30         | SWM 3     | X       | 2268       | \$496.00 |

## GHV... Wall Mount

GHV... Greiferhaltevorrichtung

GHV... 壁掛式プレート

- Economical storage of EOAT when not in production
- Accepts EOAT built on our standard GPM mounting plates as well as our GPG Spring Loaded and new GPM-SA Semi-Automatic mounting plates

|              | A   | B   | C  | Storage For      | Profile   | Weight (g) | Price    |
|--------------|-----|-----|----|------------------|-----------|------------|----------|
| <b>GHV 0</b> | 80  | 63  | 10 | All GPM 0 Plates | LX        | 95         | \$60.62  |
| <b>GHV 1</b> | 120 | 76  | 10 | All GPM 1 Plates | LX        | 147        | \$67.00  |
| <b>GHV 2</b> | 180 | 102 | 10 | All GPM 2 Plates | X/JX/HX/D | 297        | \$95.00  |
| <b>GHV 3</b> | 270 | 152 | 13 | All GPM 3 Plates | X/JX/HX/D | 817        | \$100.00 |

## GHV... Rack for EOAT Storage

GHV... Robotergreifer Gestell

GHV...EOAT収納ラック

- EOAT Storage Rack can be customized to fit your needs.
- Uses GHV Wall Mounts on Heavy Duty Profile for stability.
- Available, as shown, on heavy duty casters for mobility or fixed with L-shaped legs for storing against the wall
- Multi EOAT storage capability

## QSR... Semi-Automatic Tool Changer

QSR... Halbautomatischer Greiferwechsler

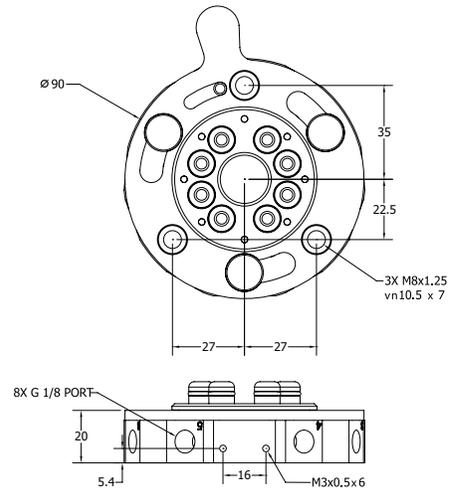

The SAS tool changer automatically connects multiple ports including air, vacuum, and electric, thereby, greatly reducing set-up time. Reliable port connection provides additional safety ensuring that all connections are aligned correctly.

### Features

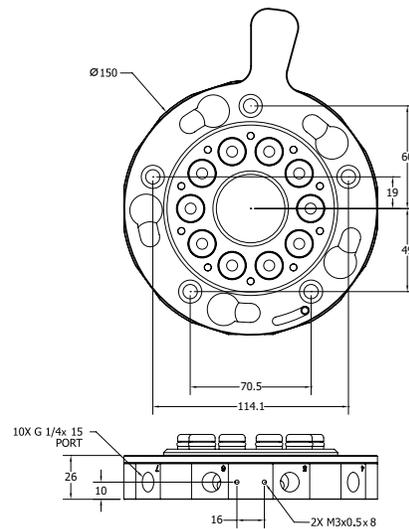

- Semi-Automatic Tool Changer for accurate, repeatable mounting of Robotic End-of-Arm Tooling.
- Couples air and vacuum lines automatically (8/10/18).
- Made of lightweight aluminum with durable steel lock ring
- Handles typical end-of-arm tool weights up to 25/75/90 lbs

|            | Weight (g) | Price    |
|------------|------------|----------|
| QSR 90-8   | 333        | \$320.00 |
| QSR 150-10 | 1114       | \$525.00 |
| QSR 160-18 | 1175       | \$600.00 |

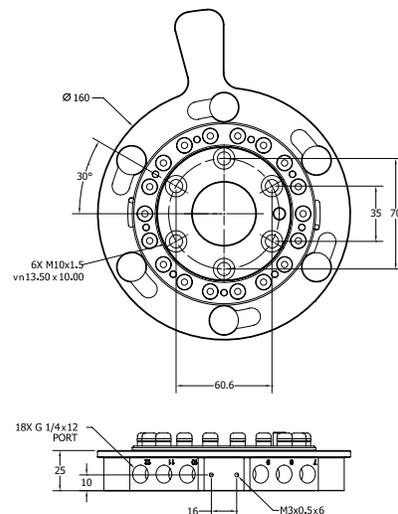

**QSR 90-8**

**QSR 150-10**

**QSR 160-18**

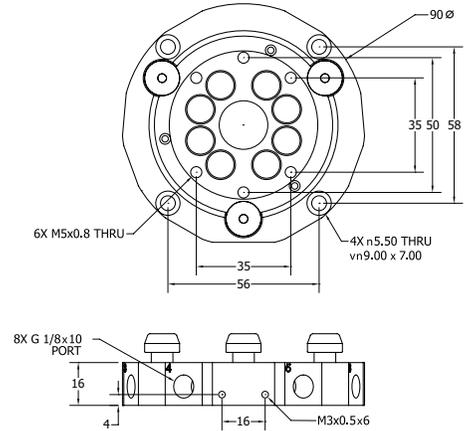

**QST... Semi-Automatic Tool Changer**

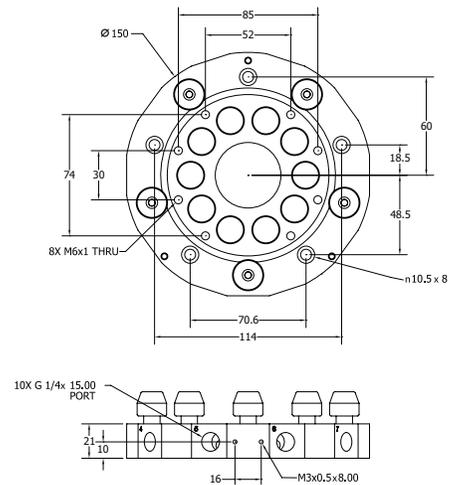

QST... Halbautomatischer Greiferwechsler

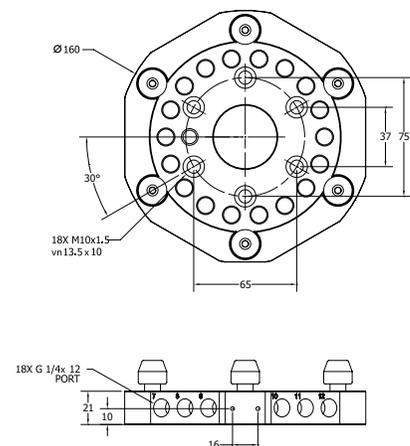

**QST 90-8**

**QST 150-10**

**QST 160-18**

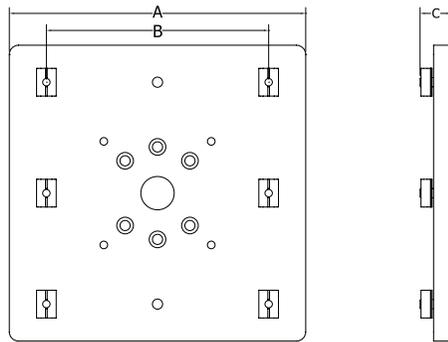

The SAS tool changer automatically connects multiple ports including air, vacuum, and electric, thereby, greatly reducing set-up time. Reliable port connection provides additional safety ensuring that all connections are aligned correctly.

- Semi-Automatic Tool Changer for accurate, repeatable mounting of Robotic End-of-Arm Tooling.
- Couples air and vacuum lines automatically (8/10/18).
- Made of lightweight aluminum with durable steel locators
- Handles typical end-of-arm tool weights up to 25/75/90 lbs

|            | Weight (g) | Price    |
|------------|------------|----------|
| QST 90-8   | 213        | \$185.00 |
| QST 150-10 | 816        | \$285.00 |
| QST 160-18 | 929        | \$375.00 |

## QMP... Mounting Plate

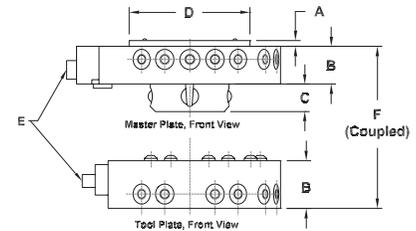

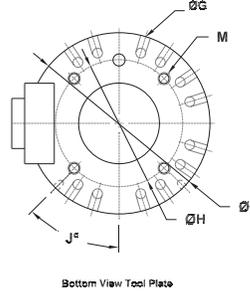

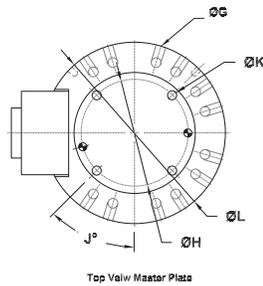

- Mounts profile straight up to the QST.
- Different size plates to mount up to the different QST sizes.

|                      | A   | B   | C  | Weight (g) | Price   |
|----------------------|-----|-----|----|------------|---------|

## TAD... Tool Alignment Device

TAD... Werkzeugjustierungshilfe  
TAD... ツール調整装置

- Allows tools to shift for proper alignment with parts
- Use with locator pins or bushings to align tools with molds or other machines
- After aligned the compensator can be locked in place for proper part placement

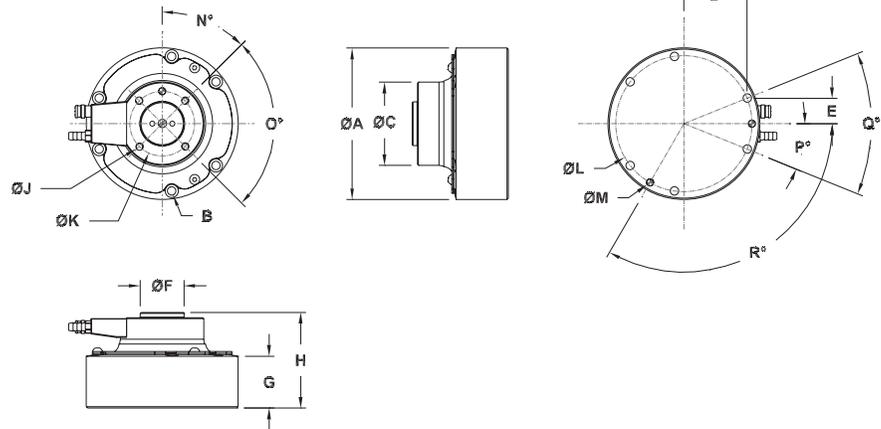

|              | A   | B  | C  | D  | E (Tap) | F (Slip Fit) | Lateral Misalignment (mm) | Rotary Misalignment | Max Payload (kg) | Payload @ 4.1 Bar (kg) | Torsion Resistance (N*m) | Price     |

TCS...Collision Sensors

TCS... Kollisionssensoren

TCS...衝突センサ

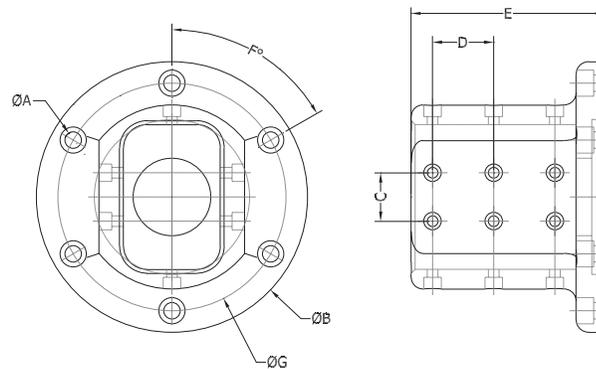

- Detects when the robot arm has encountered an obstruction
- Absorbs the crash energy
- Stops the robot to prevent costly damage to the robot arm and tooling
- Features a repeatability of 0.0005" and allows the user to adjust the amount of resistance the unit must overcome before stopping the system

| <b>SEC 80/40 JX</b> | 80 | 40 | 6 | M8 | 62         | \$21.75 |

- Soft industrial rubber bonded to an aluminum backing plate
- Seals profile cavities to create internal air ducts
- For use with D and JX Profile

## CTM... Cable and Hose Connection

CTM... Kabel- und Schlauchverbindung  
CTM...ケーブルおよび

- Convenient wiring and tubing tie-down twists tightly into standard frame profile
- Easily moveable and removeable
- CTM-15 designed to fit into L, X, & D profiles
- CTM-25 designed to fit into JX & HX profiles

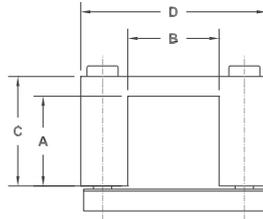

|               | A  | B  | C  | Weight (g) | Price   |
|---------------|----|----|----|------------|---------|
| <b>CTM-15</b> | 12 | 15 | 16 | 11         | \$14.00 |
| <b>CTM-25</b> | 18 | 25 | 16 | 21         | \$16.00 |

Note: Sold in packs of 10.

**KBV...** Cross Joint Connector

KBV... Kreuzverbindung  
KBV...クロスジョイントコネクター

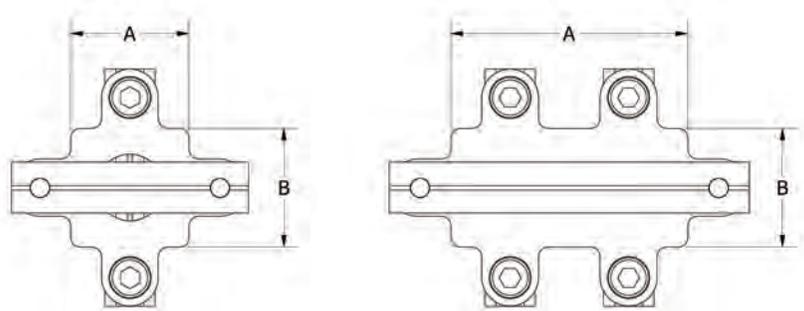

- Bridge style clamp for frame profile cross mounting
- Allows full adjustability in two dimensions simultaneously

|                     | A  | B  | C  | D   | Profile               | Weight (g) | Price   |

**WIV...** Angle Joint Connector

WIV... Winkelverbinder  
WIV...アングルジョイントコネクター

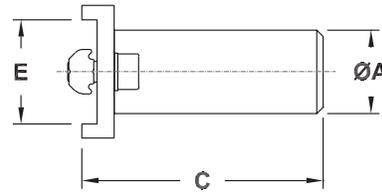

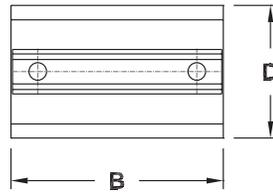

- Corner bracket for squareness and stability
- Fits in corner of 2 joining frame profiles and does not interfere with parts in other channels

|                  | A  | B  | C  | Profile | Weight (g) | Price   |
|------------------|----|----|----|---------|------------|---------|
| <b>WIV 25 X</b>  | 25 | ~  | 16 | X/D     | 28         | \$9.95  |
| <b>WIV 50 X</b>  | 51 | 20 | 16 | X/D     | 72         | \$16.88 |
| <b>WIV 40 JX</b> | 38 | ~  | 25 | JX      | 65         | \$10.25 |
| <b>WIV 80 JX</b> | 76 | 40 | 25 | JX      | 213        | \$26.85 |

## DKA... Profile Extension Arm

DKA... Einstellbarer Profilverbindungsarm  
DKA... プロファイル延長アーム

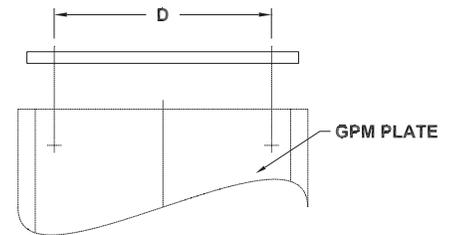

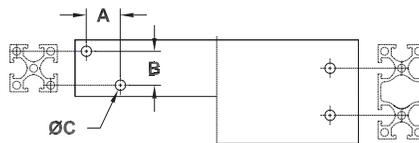

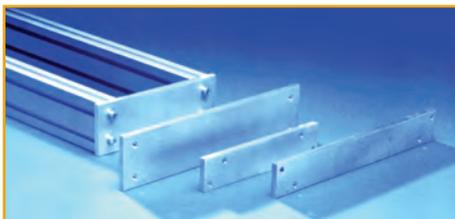

- Offsets profile connections using clamps
- Allows for clearance between profile

|                 | A  | B  | C   | D  | E  | Weight (g) | Price   |
|-----------------|----|----|-----|----|----|------------|---------|
| <b>DKA 10 L</b> | 10 | 38 | 94  | 22 | 18 | 32         | \$20.00 |
| <b>DKA 14 X</b> | 14 | 51 | 128 | 32 | 25 | 68         | \$24.75 |
| <b>DKA 20 X</b> | 20 | 51 | 158 | 32 | 25 | 99         | \$21.75 |

## EPL... End Plate

EPL... Endplatte  
EPL... エンドプレート

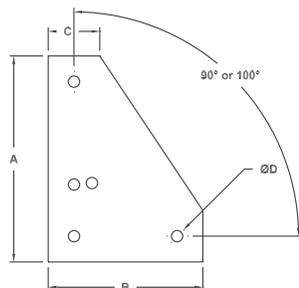

- Connects frame profile ends for added stability and strength

|                    | A  | B  | C   | D   | Mounting Plate           | Profile  | Weight (g) | Price   |

| <b>EPL 3-50 X</b>  | ~  | 25 | 5.5 | 200 | GPM 3 X/ GPM 3 SA /GPG 3 | X-50/25  | 218        | \$7.75  |
| <b>EPL 3-40 JX</b> | ~  | ~  | 8.5 | 200 | GPM 3 X                  | JX-40/40 | 218        | \$9.20  |
| <b>EPL 3-80 JX</b> | ~  | 40 | 8.5 | 200 | GPM 3 X                  | JX-80/40 | 445        | \$11.83 |

## EVB... Corner Joint Plate

EVB... Eckverbinder  
EVB... コーナージョイントプレート

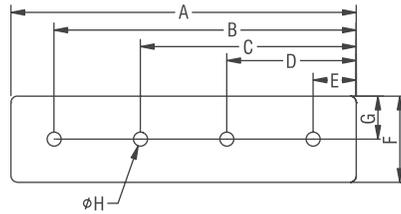

- Corner plate bracket for squareness and stability
- Joins two profiles at either a 90° or 100° fixed angle
- Forms a rigid connection

|                  | A   | B   | C  | D   | Profile | Weight (g) | Price   |
|------------------|-----|-----|----|-----|---------|------------|---------|
| <b>EVB 25 X</b>  | 100 | 75  | 25 | 5.5 | X-25    | 147        | \$15.50 |
| <b>EVB 50 X</b>  | 100 | 100 | 50 | 5.5 | X-50    | 212        | \$17.75 |
| <b>EVB 40 JX</b> | 100 | 100 | 40 | 6.5 | JX-40   | 201        | \$17.75 |

## EVG... Straight Connector Plate

EVG... Eckverbinder (Gerade)  
EVG... コネクター

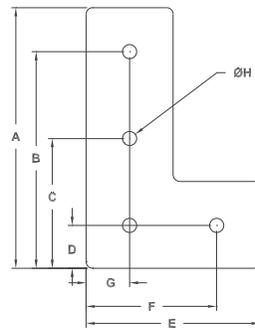

- Profile is connected end to end
- Can be used to brace L connectors on wide profile
- Forms a rigid connection

|                      | A   | B   | C   | D  | E  | F  | G  | H   | Weight (g) | Price   |

| <b>EVG 25/50 X</b>   | 50  | ~   | ~   | 38 | 13 | 25 | 13 | 5.5 | 44         | \$9.85  |
| <b>EVG 25/75 X</b>   | 75  | ~   | 63  | 38 | 13 | 25 | 13 | 5.5 | 62         | \$11.75 |
| <b>EVG 25/100 X</b>  | 100 | 88  | 63  | 38 | 13 | 25 | 13 | 5.5 | 88         | \$12.50 |
| <b>EVG 40/160 JX</b> | 160 | 140 | 100 | 60 | 20 | 40 | 20 | 6.5 | 186        | \$18.45 |

## EVL... Connector Plate

EVL... Eckverbinder (L-Form)  
EVL... L形コネクター

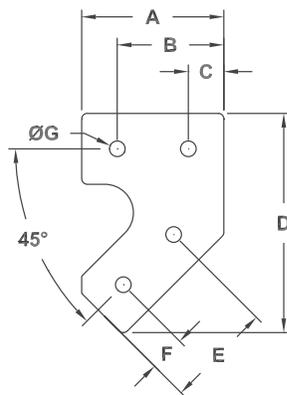

- Profile is connected perpendicular
- Forms a rigid connection

|                      | A   | B   | C  | D  | E  | F  | G  | H   | Weight (g) | Price   |
|----------------------|-----|-----|----|----|----|----|----|-----|------------|---------|
| <b>EVL 50/50 X</b>   | 50  | ~   | 38 | 13 | 50 | 38 | 13 | 5.5 | 90         | \$10.95 |
| <b>EVL 50/75 X</b>   | 75  | 63  | 38 | 13 | 50 | 38 | 13 | 5.5 | 87         | \$13.90 |
| <b>EVL 80/120 JX</b> | 120 | 100 | 60 | 20 | 80 | 60 | 20 | 6.5 | 182        | \$17.07 |

## EVW 45... 45 Degree Connector Plate

EVW... Eckverbinder (45 Grad)  
EVW... 45度コネクター

- Joins two profiles at a 45° angle
- Forms a rigid connection

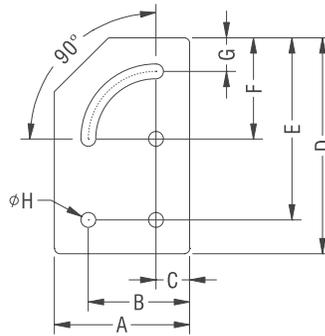

|                  | A  | B  | C  | D   | E  | F  | G   | Weight (g) | Price   |
|------------------|----|----|----|-----|----|----|-----|------------|---------|
| <b>EVW 45 X</b>  | 50 | 38 | 13 | 77  | 38 | 13 | 5.5 | 95         | \$16.45 |
| <b>EVW 45 JX</b> | 80 | 60 | 20 | 118 | 53 | 13 | 6.5 | 188        | \$18.50 |

# EVW 0-90... 0-90 Degree Connector Plate

EVW... Eckverbinder (0-90 Grad verstellbar)  
EVW... 角度調整コネクタ(0~90度)

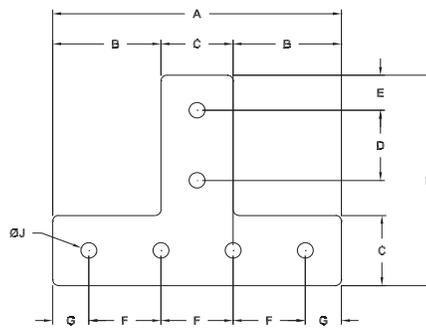

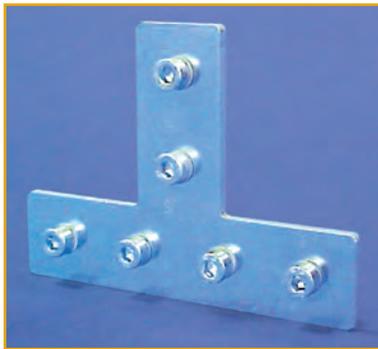

- Joins two profiles at any angle between 0 and 90°
- Angle of profile intersection can be adjusted at any time
- Forms a rigid connection

|             | A  | B  | C  | D   | E   | F  | G  | H   | Weight (g) | Price   |
|-------------|----|----|----|-----|-----|----|----|-----|------------|---------|
| EVW 0-90 X  | 50 | 38 | 13 | 80  | 68  | 38 | 13 | 5.5 | 109        | \$16.45 |
| EVW 0-90 JX | 80 | 60 | 20 | 130 | 110 | 60 | 20 | 6.5 | 255        | \$18.50 |

# EVT... T Connector Plate

EVT... Eckverbinder (T-Form)  
EVT... T形コネクタ

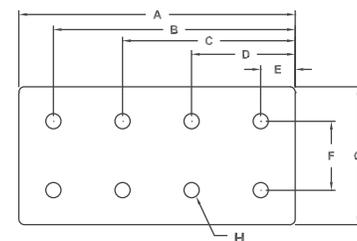

- Profile is connected perpendicular
- Forms a rigid connection

|                | A   | B  | C  | D      | E  | F x (#Holes) | G  | H   | J   | Weight (g) | Price   |
|----------------|-----|----|----|--------|----|--------------|----|-----|-----|------------|---------|
| EVT 50/75 X    | 50  | 13 | 25 | 25 X 2 | 13 | 25 X 2       | 13 | 75  | 5.5 | 88         | \$13.90 |
| EVT 100/75 X   | 100 | 38 | 25 | 25 X 2 | 13 | 25 X 4       | 13 | 75  | 5.5 | 135        | \$19.30 |
| EVT 100/80 D   | 100 | 38 | 25 | 25 X 2 | 10 | 25 X 4       | 13 | 80  | 5.5 | 135        | \$19.50 |
| EVT 100/130 D  | 100 | 38 | 25 | 25 X 3 | 10 | 25 X 4       | 13 | 130 | 5.5 | 178        | \$20.50 |

# EVD... Straight Connector Plate

EVD... Eckverbinder Doppelt (Gerade)  
EVD... ストレート・コネクタ・プレート

- Straight plates for side-by-side and end-to-end connections of profile
- Forms a rigid connection

|              | A   | B    | C    | D    | E    | F  | G  | H   | Weight (g) | Price   |
|--------------|-----|------|------|------|------|----|----|-----|------------|---------|
| EVD 50/50 X  | 50  | 37.5 | 12.5 | ~    | ~    | 25 | 50 | 5.5 | 88         | \$17.00 |
| EVD 50/100 X | 100 | 87.5 | 62.5 | 37.5 | 12.5 | 25 | 50 | 5.5 | 178        | \$22.75 |

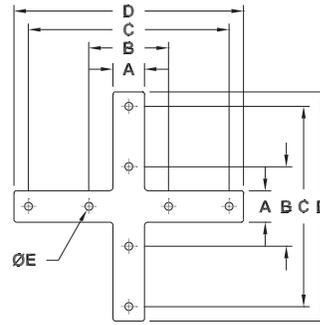

## EVC... Cross Connector

EVC... Kreuzverbinder  
EVC... クロスコネクタ

- Profile is connected perpendicular
- Forms a rigid connection
- For use with HX profile

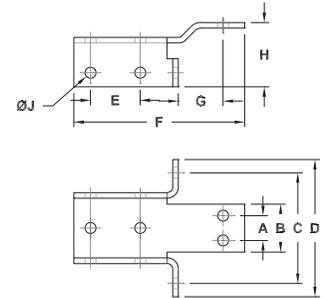

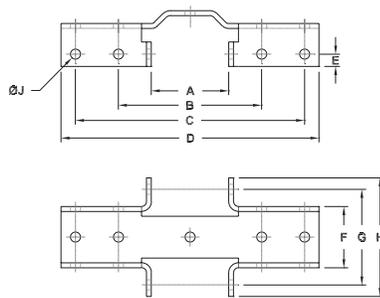

|                  | A  | B  | C   | D   | ØE  | Weight (g) | Price   |
|------------------|----|----|-----|-----|-----|------------|---------|
| <b>EVC 40/40</b> | 18 | 56 | 116 | 130 | 6.5 | 205        | \$14.34 |
| <b>EVC 60/60</b> | 26 | 66 | 166 | 190 | 6.5 | 365        | \$15.27 |

## EVH... Cross Connector

EVH... Kreuzverbinder  
EVH... クロスコネクタ

- Profile is connected perpendicular
- Forms a rigid connection
- For use with HX profile

|                    | A  | B   | C    | D    | E   | F    | G    | H    | ØJ  | Weight (g) | Price   |
|--------------------|----|-----|------|------|-----|------|------|------|-----|------------|---------|
| <b>EVH 60/40-1</b> | 15 | 29  | 66.8 | 82.8 | 30  | 103  | 27.2 | 38.9 | 6.6 | 301        | \$28.14 |
| <b>EVH 60/40-2</b> | 54 | 100 | 160  | 180  | 8.6 | 42.8 | 66.8 | 82.8 | 7   | 561        | \$50.10 |

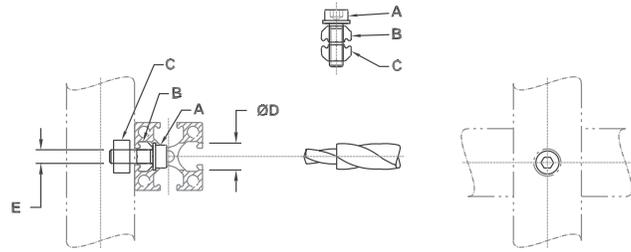

## KV... Cross Connector

KV... Kreuzverbinder  
KV... クロスコネクター

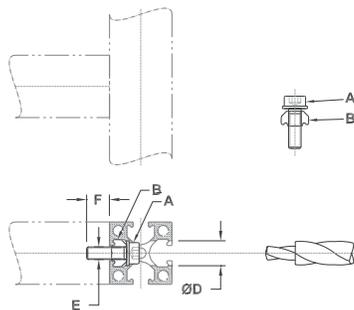

- Low cost stable cross connector for joining two similar profiles
- Will not interfere with components on either profile
- Includes cap screw, serrated lock washer, channel nut with through hole
- Drilling of one profile is required with our STB step drill

|              | A  | B      | C     | D            | E  | Profile | Weight (g) | Price  |
|--------------|----|--------|-------|--------------|----|---------|------------|--------|
| <b>KV-L</b>  | M4 | ULP 4X | GWP 4 | 8            | M4 | L       | 16         | \$5.43 |
| <b>KV-X</b>  | M5 | ULP 5X | GWP 5 | Ø10 (STB M5) | M5 | X       | 14         | \$4.68 |
| <b>KV-JX</b> | M6 | ULP 6X | GWP 6 | 15           | M6 | JX      | 15         | \$3.25 |

## SV... Butt Connector

SV... Stoßverbindung  
SV... 突合せコネクター

- Low cost stable perpendicular end-butt connector for joining two profiles
- Will not interfere with components on either profile
- Includes cap screw, serrated lock washer, and channel nut with through hole
- Drilling of one profile required using our STB step drill and tapping the end of the profile

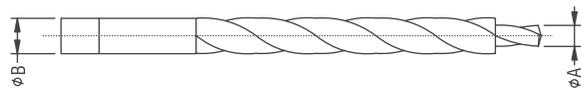

|             | A       | B      | D            | E  | Profile | Weight (g) | Price  |
|-------------|---------|--------|--------------|----|---------|------------|--------|
| <b>SV-X</b> | M5 SHCS | ULP 5X | Ø10 (STB M5) | M5 | X       | 9          | \$1.85 |

## STB... Step Drill

STB... Stufenbohrer  
STB... ドリル替刃

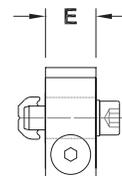

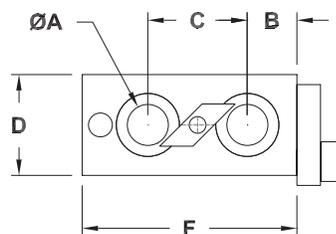

- Used for step drilling of aluminum profiles
- One drill setup for installing KV or SV connectors

|               | A (Drill) | B (C'Bore) | Profile | Weight (g) | Price   |
|---------------|-----------|------------|---------|------------|---------|
| <b>STB M5</b> | 5.5       | 10         | X       | 47         | \$38.07 |
| <b>STB M6</b> | 6.5       | 11         | JX      | ~          | \$54.40 |

## PJ... Profile Jigs

PJ... Spannvorrichtung  
PJ... プロファイル・ジグ

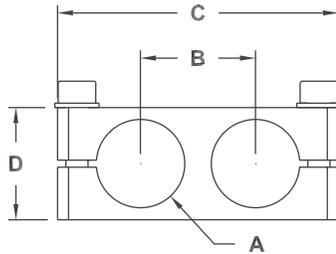

- Easily locate holes for SV & KV profile connectors
- Eliminates drill "walking" to assure square connections

|              | A  | B    | C  | D  | E  | F  | Profile | Weight (g) | Price   |
|--------------|----|------|----|----|----|----|---------|------------|---------|
| <b>PJ-X</b>  | 10 | 12.5 | 25 | 25 | 13 | 54 | X       | 75         | \$39.00 |
| <b>PJ-JX</b> | 11 | 20   | 40 | 32 | 13 | 80 | JX      | 144        | \$44.00 |

### KPC... Tube Parallel Clamp

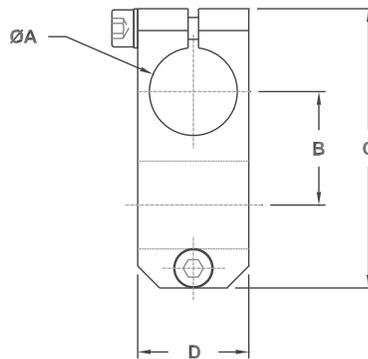

KPC... Parallelrohrklemme  
KPC... チューブ状十字ジョイント・コネクター

- Parallel profile clamp for new Tube (T) profile
- One piece construction for easy assembly

|               | A  | B  | C  | D  | Weight (g) | Price   |
|---------------|----|----|----|----|------------|---------|
| <b>KPC 10</b> | 10 | 14 | 38 | 16 | 14         | \$17.00 |
| <b>KPC 14</b> | 14 | 20 | 52 | 19 | 35         | \$18.00 |
| <b>KPC 20</b> | 20 | 26 | 64 | 25 | 48         | \$19.00 |
| <b>KPC 30</b> | 30 | 39 | 90 | 38 | ~          | \$21.00 |

### KNC... Tube Cross Clamp

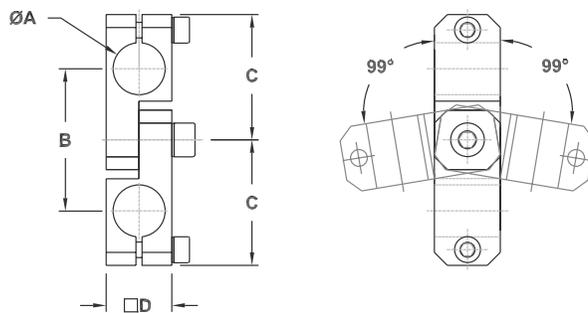

KNC... Verbinder für Rundrohr  
KNC... チューブ状十字ジョイント・コネクター

- Adjustable angle cross connection of new Tube(T) profile
- One piece construction for easy assembly

|               | A  | B  | C  | D  | Weight (g) | Price   |
|---------------|----|----|----|----|------------|---------|
| <b>KNC 10</b> | 10 | 14 | 38 | 16 | ~          | \$18.00 |
| <b>KNC 14</b> | 14 | 20 | 52 | 19 | 40         | \$19.50 |
| <b>KNC 20</b> | 20 | 26 | 64 | 25 | 70         | \$21.00 |
| <b>KNC 30</b> | 30 | 39 | 90 | 38 | 215        | \$23.00 |

### KAC... Tube Angle Swivel Clamp

KAC... Verbinder für Rundrohr  
KAC... チューブ状十字ジョイント・コネクター

- Adjustable angle cross connection for new Tube (T) profile
- One piece construction for easy assembly

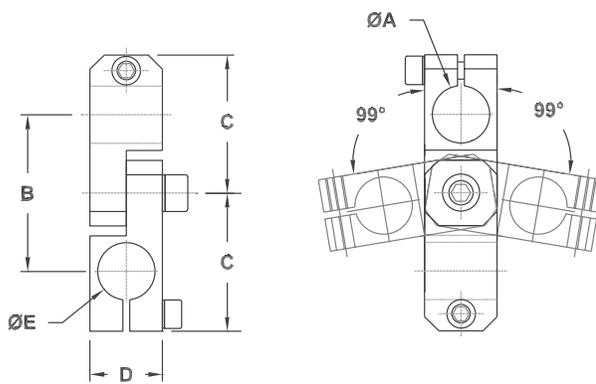

|                  | A  | B  | C  | D  | Weight (g) | Price   |
|------------------|----|----|----|----|------------|---------|
| <b>KAC 14-14</b> | 14 | 55 | 48 | 25 | 153        | \$18.00 |
| <b>KAC 20-20</b> | 20 | 55 | 48 | 25 | 131        | \$21.00 |
| <b>KAC 30-30</b> | 30 | 77 | 64 | 38 | 342        | \$29.09 |

### KEC... Tube Cross Swivel Clamp

KEC... Rohrklemme gekreuzt schwenkbar

KEC... チューブ状調節可能アングル十字ジョイント・コネクター

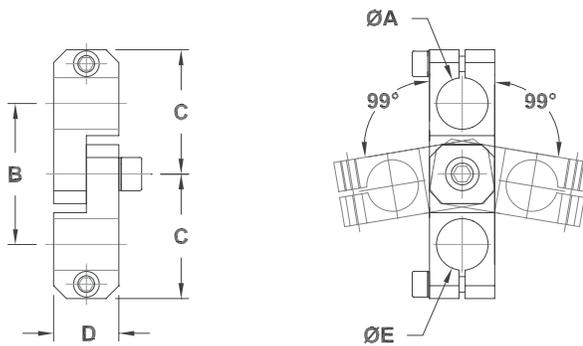

- Swivel cross connection for new Tube (T) profile
- One piece construction for easy assembly

|                  | A  | B  | C  | D  | E  | Weight (g) | Price   |
|------------------|----|----|----|----|----|------------|---------|
| <b>KEC 14-14</b> | 14 | 55 | 48 | 25 | 14 | 155        | \$18.00 |
| <b>KEC 14-20</b> | 14 | 55 | 48 | 25 | 20 | 146        | \$20.00 |
| <b>KEC 20-20</b> | 20 | 55 | 48 | 25 | 20 | 132        | \$29.87 |
| <b>KEC 20-30</b> | 20 | 77 | 64 | 38 | 30 | ~          | \$40.27 |
| <b>KEC 30-30</b> | 30 | 77 | 64 | 38 | 30 | ~          | \$30.45 |

### KIC... Tube Parallel Swivel Clamp

KIC... Rohrklemme parallel schwenkbar

KIC... チューブ状調節可能アングル十字ジョイント・コネクター

- Parallel connector for new Tube (T) profile
- One piece construction for easy assembly

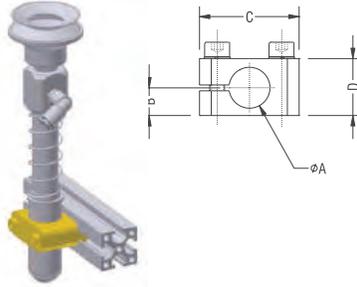

|                  | A  | B  | C  | D  | E  | Weight (g) | Price   |
|------------------|----|----|----|----|----|------------|---------|
| <b>KIC 14-14</b> | 14 | 55 | 48 | 25 | 14 | 155        | \$18.00 |
| <b>KIC 14-20</b> | 14 | 55 | 48 | 25 | 20 | 144        | \$20.00 |
| <b>KIC 20-20</b> | 20 | 55 | 48 | 25 | 20 | 131        | \$25.00 |
| <b>KIC 20-30</b> | 20 | 77 | 64 | 38 | 30 | 370        | \$35.31 |
| <b>KIC 30-30</b> | 30 | 77 | 64 | 38 | 30 | 327        | \$28.00 |

**KVB... Cross Clamp**

KVB... Kreuzverbinder  
KVB... クロスクランプ

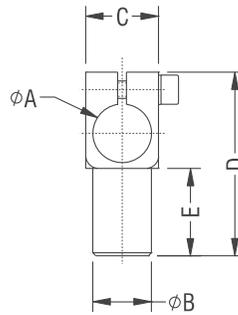

- Allows for side mounting of gripper arms to frame profiles
- Allows for mounting of new Tube (T) profiles to standard frame profiles

|               | A  | B  | C    | D  | Recommended Profile | Weight (g) | Price   |
|---------------|----|----|------|----|---------------------|------------|---------|
| <b>KVB 10</b> | 10 | 8  | 25   | 16 | L/X/D/HX            | 21         | \$10.00 |
| <b>KVB 14</b> | 14 | 10 | 34   | 19 | L/X/JX/D/HX         | 36         | \$14.75 |
| <b>KVB 20</b> | 20 | 18 | 40   | 25 | X/JX/D/HX           | 51         | \$14.50 |
| <b>KVB 30</b> | 30 | 18 | 50.8 | 38 | X/JX/D/HX           | 94         | \$18.50 |

**SKS... Insert Clamp**

SKS... Steckklemmstück  
SKS... インサートクランプ

- Supplies 90° mounting with rotation
- Short shaft clamp

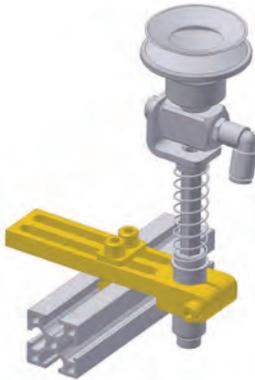

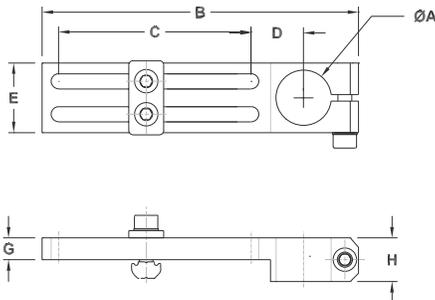

|                  | A  | B  | C  | D  | E  | Weight (g) | Price   |
|------------------|----|----|----|----|----|------------|---------|
| <b>SKS 20</b>    | 20 | 20 | 25 | 63 | 30 | 54         | \$22.75 |
| <b>SKS 20-30</b> | 30 | 20 | 38 | 78 | 34 | 81         | \$27.50 |

**WSL... Long Angle Clamp**

WSL... Winkelklemmstück  
WSL... ロングアングルクランプ

- Allows for top mounting of gripper arms and holders to frame profile
- Adjustable parallel and perpendicular to the frame
- Nylon-titanium composite clamps are less expensive and lighter weight
- Aluminum clamps are more rigid for instances where precise locating is needed such as GRF gripper fingers and ASZ cutters
- Hex head screws available upon request

| Nylon Titanium      | A  | B   | C  | D  | E  | G  | H  | Profile     | Weight (g) | Price   |
|---------------------|----|-----|----|----|----|----|----|-------------|------------|---------|

## WSL...T Top Long Angle Clamp

- Allows for top mounting of gripper arms or holders to frame profile
- Adjustable parallel and perpendicular to the frame
- Screw head points out from profile so clamps can be mounted close together
- Allows for close mounting of clamps.

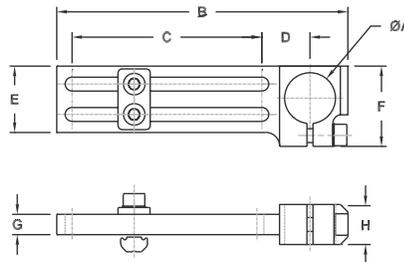

WSL...T Winkelklemmstück (mit Kopfschraube)  
WSL...T トップ・ロング・アングル・クランプ

| Aluminum        | A  | B   | C  | D  | E  | F  | G  | H  | Profile     | Weight (g) | Price   |

## WSL...TRB Long Angle Clamp

- Allows for top or bottom mounting of gripper arms or holders to frame profile
- Adjustable parallel and perpendicular to the frame
- Thick aluminum clamps are more rigid for use with extremely heavy parts and MR cutters
- Allows for close mounting of clamps.

WSL...TRB Drehbares Winkelklemmstück (mit Kopfschraube)  
WSL...TRB トップ可逆ロング・アングル・クランプ

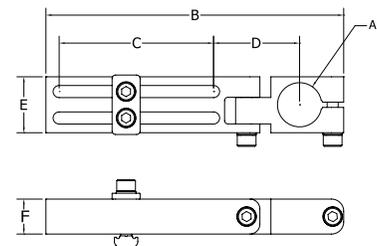

| Aluminum          | A  | B   | C  | D  | E  | F  | G  | Profile     | Weight (g) | Price   |
|-------------------|----|-----|----|----|----|----|----|-------------|------------|---------|

## WSL...SH Angle Clamp

- Allows for top mounting of gripper arms and holders to frame profile
- Adjustable parallel and perpendicular to the frame
- Clamps offers a swivel mounting

| Aluminum         | A  | B   | C  | D    | E  | F  | Weight (g) | Price   |
|------------------|----|-----|----|------|----|----|------------|---------|
| <b>WSL SH 10</b> | 10 | 90  | 45 | 26   | 16 | 10 | 39         | \$31.50 |
| <b>WSL SH 14</b> | 14 | 114 | 60 | 31.5 | 23 | 13 | 80         | \$34.20 |
| <b>WSL SH 20</b> | 20 | 135 | 70 | 39   | 26 | 16 | 123        | \$36.45 |
| <b>WSL SH 30</b> | 30 | 153 | 70 | 49   | 39 | 19 | 250        | \$38.70 |

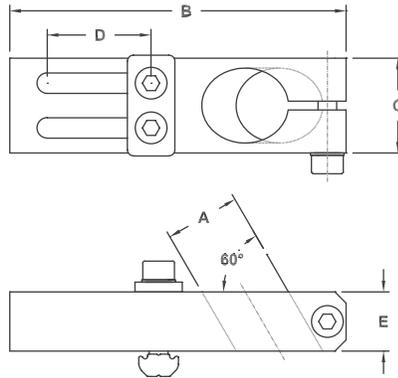

## WSA... Long Angle Clamp

WSA... Winkelklemmstück 30°

WSA... ロング・アングル・クランプ

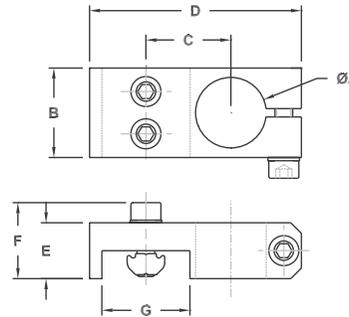

- Mounts components and extension arms at a 30° angle to profile surface
- Adjustable parallel and perpendicular to frame profile

| Aluminum      | A  | B   | C  | D  | E  | Profile   | Weight (g) | Price   |
|---------------|----|-----|----|----|----|-----------|------------|---------|
| <b>WSA 10</b> | 10 | 65  | 16 | 19 | 10 | X/JX/HX/D | 34         | \$21.50 |
| <b>WSA 14</b> | 14 | 80  | 25 | 25 | 10 | X/JX/HX/D | 94         | \$21.50 |
| <b>WSA 20</b> | 20 | 90  | 25 | 30 | 16 | X/JX/HX/D | 94         | \$22.50 |
| <b>WSA 30</b> | 30 | 113 | 38 | 40 | 19 | X/JX/HX/D | 198        | \$24.50 |

## WST... Angle Clamp

WST... Winkelklemmstück

WST...アングルクランプ

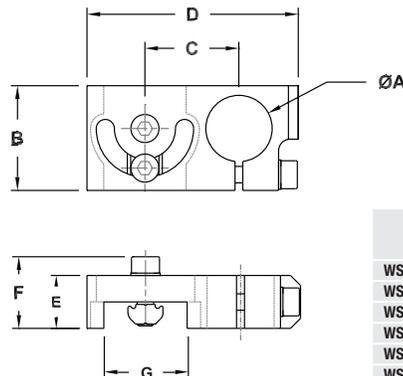

- Allows for top mounting of gripper arms or holders to frame profile
- Adjustable along the channel of the frame profile
- Hex head screws available upon request

|                  | A  | B  | C  | D  | E  | F  | G  | Profile | Weight (g) | Price   |
|------------------|----|----|----|----|----|----|----|---------|------------|---------|
| <b>WST 10 L</b>  | 10 | 16 | 16 | 40 | 10 | 14 | 18 | L       | 21         | \$10.50 |
| <b>WST 10 X</b>  | 10 | 16 | 20 | 47 | 10 | 14 | 25 | X       | 22         | \$10.63 |
| <b>WST 14 X</b>  | 14 | 25 | 21 | 52 | 13 | 19 | 25 | X       | 41         | \$13.25 |

## WST...TR Reversible Top Angle Clamp

WST...TR Winkelklemmstück verstellbar

WST...TR 可逆トップ・アングル・クランプ

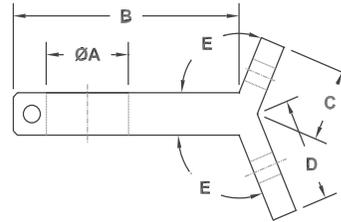

- Allows for top mounting of gripper arms or holders to frame profile
- Adjustable along the channel of the frame profile
- Allows for close mounting of clamps
- Reverse mounting offers 180° adjustability

|                     | A  | B  | C  | D  | E  | F  | G  | Profile | Weight (g) | Price   |
|---------------------|----|----|----|----|----|----|----|---------|------------|---------|
| <b>WST 10 L-TR</b>  | 10 | 22 | 20 | 41 | 10 | 19 | 18 | L       | 23         | \$11.61 |
| <b>WST 10 X-TR</b>  | 10 | 22 | 24 | 48 | 10 | 19 | 25 | X       | 28         | \$17.50 |

## WSY... Y-Angle Clamp

WSY... Y-Klemmstück  
WSY... アングル・クランプ

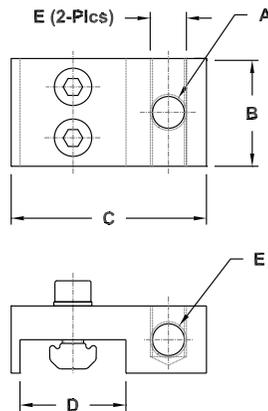

- Allows for sturdy offset mounting of extension arms and components to D profile
- Adjustable along the channel of the frame profile

| Aluminum | A  | B  | C  | D  | E   | Profile | Weight (g) | Price   |
|----------|----|----|----|----|-----|---------|------------|---------|
| WSY 20 D | 20 | 55 | 17 | 25 | 113 | D       | 126        | \$22.50 |

## WSS... Angle Connector

WSS... Winkelstück  
WSS...アングル コネクタ

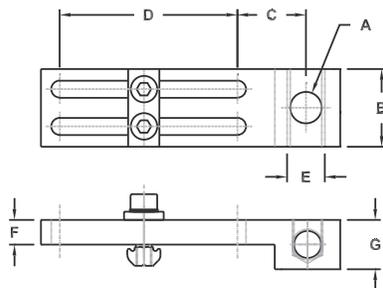

- Allows for low profile height by mounting vacuum cups directly to the frame profile
- Adjustable along the channel of the frame profile
- Extra port can connect vacuum to another cup

|           | A      | B  | C  | D  | E      | Profile | Weight (g) | Price   |
|-----------|--------|----|----|----|--------|---------|------------|---------|
| WSS M5 L  | M5     | 16 | 32 | 18 | M5     | L       | 18         | \$12.00 |
| WSS 1/8 X | G 1/8" | 25 | 46 | 25 | G 1/8" | X       | 47         | \$14.75 |
| WSS 1/4 X | G 1/4" | 25 | 46 | 25 | G 1/8" | X       | 47         | \$15.50 |

## WLS... Long Angle Connector

WLS... Winkelstück (lang)  
WLS...ロングアングルコネクター

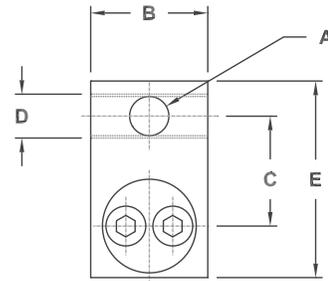

- Allows for low profile height by mounting vacuum cups directly to the frame profile
- Adjustable parallel and perpendicular to the frame profile
- Extra port can connect vacuum to another cup

|         | A      | B  | C  | D  | E      | F | G  | Profile     | Weight (g) | Price   |
|---------|--------|----|----|----|--------|---|----|-------------|------------|---------|
| WLS M5  | M5     | 16 | 16 | 45 | M5     | 6 | 13 | L/X         | 13         | \$13.00 |
| WLS 1/8 | G 1/8" | 25 | 23 | 57 | G 1/8" | 8 | 16 | L/X/HX/D    | ~          | \$18.25 |
| WLS 1/4 | G 1/4" | 25 | 23 | 57 | G 1/8" | 8 | 16 | L/X/JX/HX/D | ~          | \$18.25 |

## WSD... Adjustable Angle Connector

WSD... Winkelstück 360° drehbar  
WSD... 角度調整アングルコネクター

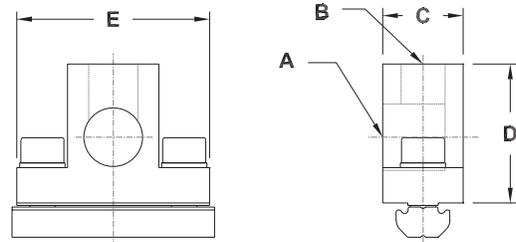

- Allows for low profile height by mounting vacuum cups directly to the frame profile
- Adjustable along the frame profile and at any rotational angle

|                | A      | B  | C  | D      | E  | Angle | Profile     | Weight (g) | Price   |
|----------------|--------|----|----|--------|----|-------|-------------|------------|---------|
| <b>WSD M5</b>  | M5     | 16 | 16 | M5     | 32 | 360   | L/X         | 21         | \$14.90 |
| <b>WSD 1/8</b> | G 1/8" | 25 | 23 | G 1/8" | 46 | 360   | L/X/JX/HX/D | 60         | \$18.75 |
| <b>WSD 1/4</b> | G 1/4" | 25 | 23 | G 1/8" | 46 | 360   | L/X/JX/HX/D | 59         | \$24.71 |

## SAS... Vacuum Cup Connector

SAS... Saugeranschluss (seitlich)  
SAS... 吸着パッドコネクター

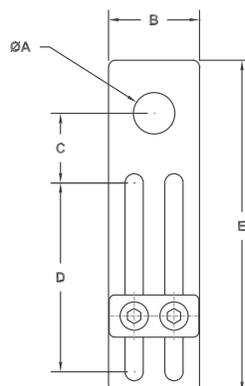

- Provides minimum profile height, allowing vacuum cups to be mounted to the side of the frame profile
- Adjustable along the channel of the frame profile

|                | A      | B      | C  | D  | E  | Profile   | Weight (g) | Price   |
|----------------|--------|--------|----|----|----|-----------|------------|---------|
| <b>SAS 1/8</b> | G 1/8" | G 1/8" | 16 | 25 | 38 | L/X/D     | 43         | \$10.75 |
| <b>SAS 1/4</b> | G 1/4" | G 1/8" | 16 | 25 | 38 | X/JX/HX/D | 42         | \$10.75 |

## WSF... Long Angle Plate

WSF... Befestigungsplatte (lang)  
WSF... 長い角度版

- Mounts Grip-It! Vacuum Cup Holders to our standard frame profile

|                 | A  | B  | C  | D  | E   | Profile     | Weight (g) | Price   |
|-----------------|----|----|----|----|-----|-------------|------------|---------|
| <b>WSF 10.5</b> | 11 | 27 | 21 | 57 | 100 | L/X/JX/HX/D | 37         | \$12.50 |
| <b>WSF 12.5</b> | 13 | 27 | 21 | 57 | 100 | L/X/JX/HX/D | 37         | \$16.63 |
| <b>WSF 16.5</b> | 17 | 27 | 21 | 57 | 100 | L/X/JX/HX/D | 35         | \$16.16 |

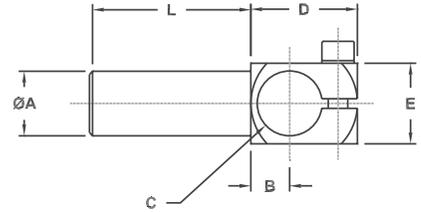

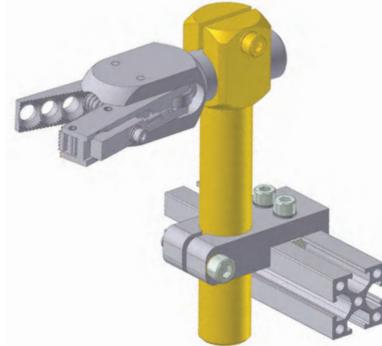

### WKA... Angle Arm

WKA... Winkelarm  
WKA...アングル アーム

- Extends and mounts components to mounting clamps
- Supplies 90° mounting with rotation

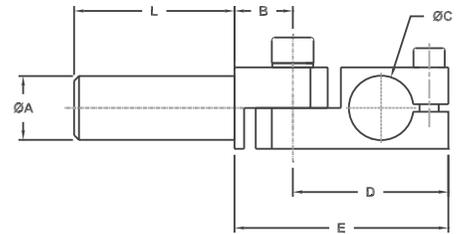

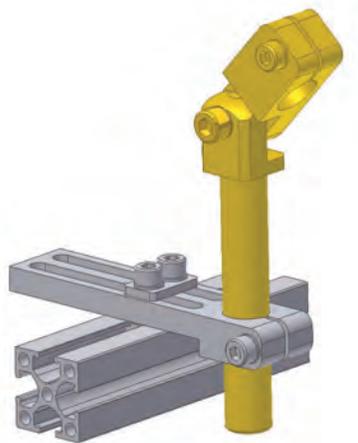

|                   | A  | B  | C  | D  | E  | L   | Weight (g) | Price   |
|-------------------|----|----|----|----|----|-----|------------|---------|
| <b>WKA 10-90</b>  | 10 | 13 | 10 | 20 | 16 | 90  | 22         | \$16.75 |
| <b>WKA 14-120</b> | 14 | 9  | 14 | 25 | 22 | 120 | 21         | \$20.50 |
| <b>WKA 20-150</b> | 20 | 21 | 20 | 33 | 25 | 150 | 92         | \$27.50 |
| <b>WKA 30-200</b> | 30 | 30 | 30 | 48 | 32 | 200 | 224        | \$32.25 |

### GLA... Elbow Arm

GLA... Gelenkarm  
GLA...エルボー アーム

- Angle adjustable elbow
- Useful for adjustment of GRZ gripper pliers and GRF gripper fingers

|                      | A  | B  | C  | D  | E  | L   | Weight (g) | Price   |
|----------------------|----|----|----|----|----|-----|------------|---------|
| <b>GLA 10-90</b>     | 10 | 11 | 10 | 27 | 40 | 90  | 36         | \$19.00 |
| <b>GLA 14-120</b>    | 14 | 16 | 14 | 43 | 54 | 120 | 70         | \$28.15 |
| <b>GLA 20-150</b>    | 20 | 18 | 20 | 46 | 64 | 150 | 150        | \$38.50 |
| <b>GLA 20/30-150</b> | 20 | 17 | 30 | 52 | 77 | 150 | 193        | \$42.75 |

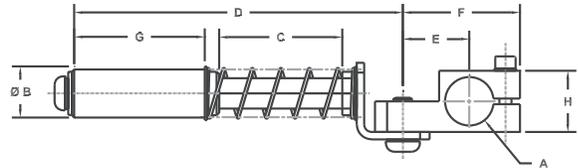

## GGA... Spring Loaded Elbow Arm

GGA... Gelenkarm (gefedert)  
GGA... スプリング負荷エルボ-アーム

- Angle adjustable elbow arm
- Spring loaded for part compliance

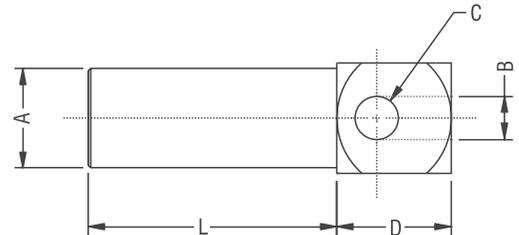

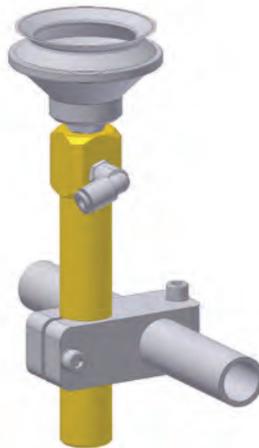

|                    | A  | B  | C  | D   | E  | F  | G  | H  | Weight (g) | Price   |
|--------------------|----|----|----|-----|----|----|----|----|------------|---------|
| <b>GGA 14-C-15</b> | 14 | 14 | 15 | 75  | 23 | 40 | 32 | 19 | 109        | \$50.00 |
| <b>GGA 14-C-40</b> | 14 | 14 | 40 | 100 | 23 | 40 | 32 | 19 | 121        | \$50.00 |
| <b>GGA 20-C-20</b> | 20 | 20 | 20 | 107 | 28 | 49 | 55 | 25 | 278        | \$56.00 |
| <b>GGA 20-C-50</b> | 20 | 20 | 50 | 137 | 28 | 49 | 55 | 25 | 311        | \$59.00 |

## GSE... Gripper Arm

GSE... Greifarm  
GSE... ハンドアーム

- Extends and mounts vacuum cups to mounting clamps
- Side ported for quick-touch pneumatic hose connectors
- The recommended max torque is 50 in-lbs (5.6 N-m) on M5 screws when clamping on shafts.

|                       | A  | B      | C      | D  | L   | Weight (g) | Price   |
|-----------------------|----|--------|--------|----|-----|------------|---------|
| <b>GSE 10-M5-90</b>   | 10 | M5     | M5     | 10 | 90  | 17         | \$13.25 |
| <b>GSE 10-1/8-90</b>  | 10 | G 1/8" | M5     | 10 | 90  | 18         | \$15.00 |
| <b>GSE 14-120</b>     | 14 | G 1/8" | G 1/8" | 22 | 120 | 32         | \$23.25 |
| <b>GSE 20-150</b>     | 20 | G 1/4" | G 1/8" | 30 | 150 | 77         | \$27.00 |
| <b>GSE 30-200</b>     | 30 | G 1/4" | G 1/4" | 30 | 200 | 183        | \$33.00 |
| <b>GSE 30-3/8-200</b> | 30 | G 3/8" | G 1/4" | 30 | 200 | 176        | \$34.00 |

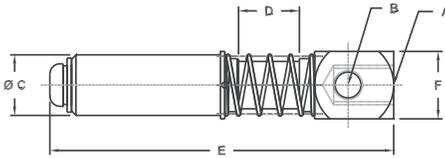

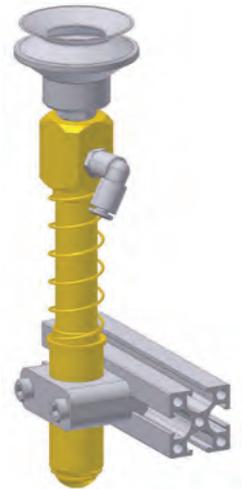

## GAF... Spring Loaded Gripper Arm

GAF... Greifarm gefedert  
GAF... スプリングハンドアーム

- Extends and mounts vacuum cups to mounting clamps
- Side ported for quick-touch pneumatic hose connectors
- Spring-loaded for part compliance
- Available with clampable shaft (C) and threaded shaft (M)
- Threaded shafts include jam nuts and lock washers for plate mounting

| C-Type             | A      | B      | C  | D  | E   | F  | Weight (g) | Price   |

## GSZ... Inline Spring Arm

GSZ... gefederter Angusszangenarm

Compatible with SAS GRZ 20-16... Sprue/Part Pliers, this spring loaded arm enables the GRZ to absorb the ejector stroke of the mold. Used when sprues and runner systems do not stay on the ejector pins after ejection from the mold.

Specifications:

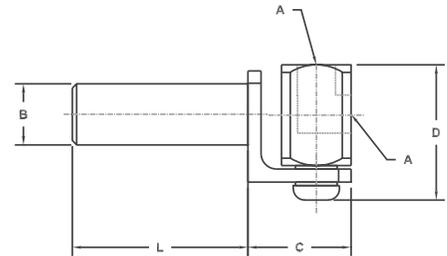

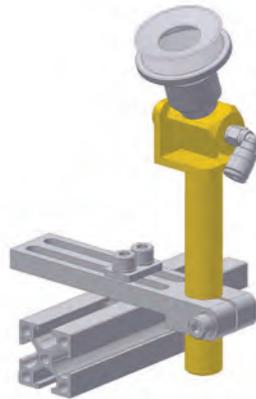

- Inline spring arm for GRZ 20-16... Part / Sprue Pliers
- End ported for quick- touch pneumatic hose connectors
- Available with clampable shafts (C) and threaded shaft (M)
- Threaded shafts include jam nut and lock washers for plate mounting

GGE... Elbow Gripper Arm

GGE... Gelenkgreifarm  
GGE... センサー付ハンドアーム

- Extends and mounts vacuum cups to mounting clamps
- Side ported for quick-touch pneumatic hose connectors
- Top bracket adjusts angle to match contour of part
- When clamping shafts, maximum recommended torque on M5 clamping screws is 50 in-lbs (5.6 N-m)
- One-piece arm for high strength applications
- "Green" EOAT application

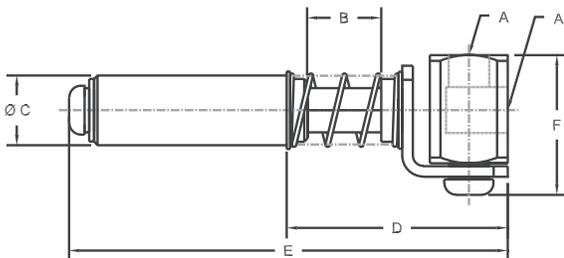

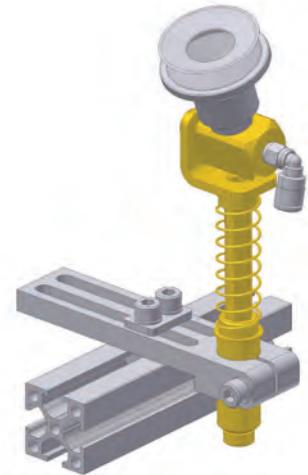

|                   | A      | B  | C  | D  | L   | Weight (g) | Price   |

GGS... Spring Loaded Non-Rotational Gripper Arm

GGS... Greifarm gefedert & verdrehgesichert

- Extends and mounts vacuum cups to mounting clamps
- SFX Type includes a proximity sensor for compliance and top of stack detection
- Side ported for quick-touch pneumatic hose connectors
- Top bracket adjusts angle to match contour of part
- Spring-loaded for part compliance
- Available with clampable shaft (C), threaded shaft (M), and Bearing Type (B)
- Threaded shafts include jam nuts and lock washers for plate mounting
- Bearing Type offers super smooth operation
- "Green" EOAT application

RVA... Retracting Vacuum Arm

RVA... Vakuuarm, einziehbar  
RVA...吸着パッド取付伸縮アーム

- Used in conjunction with a vacuum cup to retract the work piece once vacuum is made
- Aids in insert molding, transfer molding, and short cycle molding
- Extendable for longer reach (using VLR)

|                  | A  | B  | C   | D       | E   | F      | G (Hub) | Weight (g) | Price    |

**VACUUM CUP MATERIAL:**

- Chloroprene (C):** Good wear resistance properties, O-zone resistant, -40° to 230°F (-40° to 110°C)
- Polyurethane (P):** Best wear resistance, super long life, oil resistant, non-marking, 0° to 320°F (0° to 160°C)
- Nitril Rubber (N):** Good wear resistance properties, oil resistant, -20° to 225°F (-29° to 107°C)
- Silicone (S):** Soft material, especially good for rough/textured surfaces, -86° to 392°F (-65° to 200°C)
- Viton (V):** High resistance against compression and tension, -23° to 446°F (-30° to 230°C)
- Polyurethane (Pu):** Soft polyurethane, best on textured surfaces, good wear resistance, oil resistant, -68° to 167°F (-55° to 75°C)
- Duel Durometer Polyurethane (DDP):** Soft seal with stiffer base, best on textured surfaces with high vacuum levels, good wear and oil resistance, -50° to 122°F (10° to 50°C)

**LIFTING CAPACITY:**

The lifting capacity of a vacuum cup can be theoretically determined at sea level by using the following formula:

$$C = \frac{.393 \times D^2 \times V}{N}$$

- C = Lifting Capacity (lbs.)
- D = Cup Diameter (in.)
- V = Vacuum Level (in. Hg)
- N = Desired Safety Factor
- Safety factor for horizontal lifting applications should be at least (2). Vertical lifting applications should have a safety factor of at least (4).

**SIZING VACUUM CUPS:**

When sizing a vacuum cup there are three crucial factors to consider. These are vacuum level, number of cups, and the desired safety factor. Cup diameter can be determined by using the following formula:

$$D = 1.61 \times (\sqrt{M \times N} / \sqrt{V \times U})$$

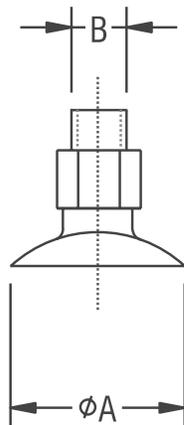

- D = Cup Diameter (in.)
- M = Mass of lifting products (lbs.)
- V = Vacuum Level (in. Hg)
- N = Safety Factor
- U = Number of Cups

**VC 1... Flat Vacuum Cup**

VC 1... Vakuumsauger (1 Kante)  
VC 1...標準パッド

- Flat cups for flat surfaces and high side loading
- Sealing ring included

## KHZ... Short Stroke Cylinder

KHZ... Kurzhubzylinder  
KHZ... ショートストロークシリンダー

- Cylinders for applications such as applying side pressure
- Single and Double acting cylinders available
- Available with or without sensor capability

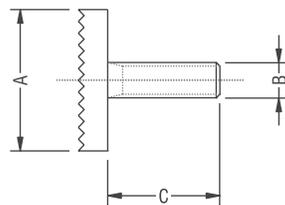

|               | Cyl. Bore | A       | B  | C                   | D      | H (Stroke) | M    | Action | Sensor Capable* | Weight (g) | Price   |
|---------------|-----------|---------|----|---------------------|--------|------------|------|--------|-----------------|------------|---------|
| KHZ 12-5-E    | 12        | M3x0.5  | 22 | 3.5 / 6.5 Depth 3.5 | M5     | 5          | 20.5 | Single | ~               | ~          | \$19.15 |
| KHZ 12-5-D    | 12        | M3x0.5  | 22 | 3.5 / 6.5 Depth 3.5 | M5     | 5          | 20.5 | Double | ~               | 31         | \$20.90 |

\* Available sensors are RRK-93 & RRK-F9P.

See "Sensors, Connectors, and Accessories" section for sensor specifications and offerings.

## DPL... Pressure Plate

DPL... Druckplatte  
DPL... 圧カプレート

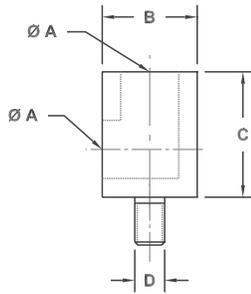

- Pad plates for KHZ cylinders or GRF gripper fingers
- DPL 25's are rubberized to protect parts

|          | A  | B  | C  | Face Material | Weight (g) | Price   |
|----------|----|----|----|---------------|------------|---------|
| DPL 12-3 | 12 | M3 | 9  | Steel         | 3          | \$5.60  |
| DPL 25-3 | 25 | M3 | 7  | Rubber        | 11         | \$4.25  |
| DPL 25-4 | 25 | M4 | 13 | Rubber        | 11         | \$16.51 |
| DPL 25-5 | 25 | M5 | 13 | Rubber        | 12         | \$5.75  |

## AVI... Vacuum Cup Adaptor

AVI...Adapter für Vakuumsauger  
AVI... 真空カップ・アダプ

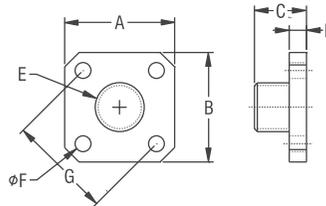

- Mounts a vacuum cup / suction cup to a KHZ short stroke cylinder
- Used to secure parts with edges perpendicular to the mold face

|                      | A      | B  | C  | D         | Weight (g) | Price   |
|----------------------|--------|----|----|-----------|------------|---------|
| <b>AVI 5I-8-3</b>    | M5     | 10 | 12 | M3 x .5   | 7          | \$19.13 |
| <b>AVI 1/8I-16-5</b> | G 1/8" | 16 | 21 | M5 x .8   | 30         | \$8.50  |
| <b>AVI 1/8I-16-8</b> | G 1/8" | 16 | 21 | M8 x 1.25 | 29         | \$9.00  |
| <b>AVI 1/4I-16-8</b> | G 1/4" | 19 | 26 | M8 x 1.25 | 51         | \$10.93 |

## ADZ... Short Stroke Cylinder Adapter

ADZ... Adapter für Kurzhub bzw. Sonderzylinder  
ADZ... ショートストロークシリンダー用アダプター

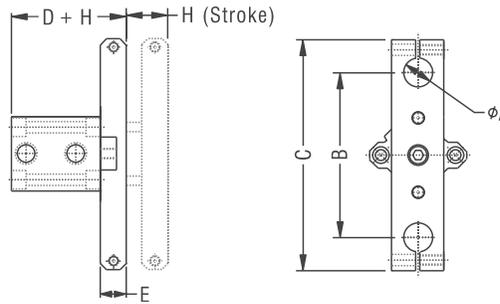

- Allows KHZ cylinders to attach to standard VLR Arm Extensions and mount in standard mounting clamps

|                  | Cylinder  | A  | B  | C  | D | E       | F  | G  | Extension | Weight (g) | Price   |
|------------------|-----------|----|----|----|---|---------|----|----|-----------|------------|---------|
| <b>ADZ 14-12</b> | KHZ 12... | 25 | 25 | 18 | 6 | M12 x 1 | M3 | 22 | VLR 14    | 13         | \$28.25 |
| <b>ADZ 20-20</b> | KHZ 20... | 38 | 38 | 18 | 6 | M17 x 1 | M5 | 36 | VLR 20    | 29         | \$29.75 |
| <b>ADZ 20-32</b> | KHZ 32... | 45 | 45 | 18 | 6 | M17 x 1 | M5 | 48 | VLR 20    | 38         | \$31.25 |
| <b>ADZ 30-32</b> | KHZ 32... | 45 | 45 | 18 | 6 | M27 x 1 | M5 | 48 | VLR 30    | 49         | \$29.75 |

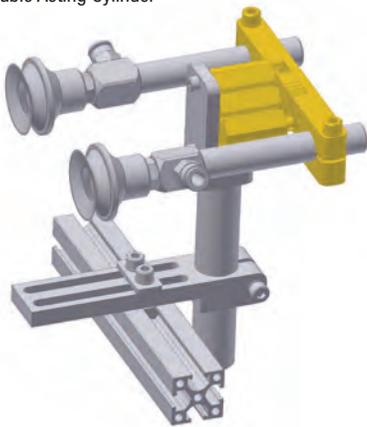

## SZD... Special Cylinder

SZD... Sonderzylinder  
SZD... 特殊シリンダー

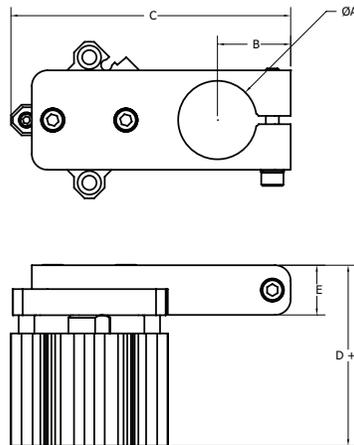

- Perfect for securing sides or flexing parts
- Usually utilized with GSE arms and vacuum cups or GRF gripper fingers (not included)
- Available with or without sensors
- Double Acting Cylinder

|             | Cylinder Bore | A  | B   | C   | D  | E  | H (Stroke) | Sensor Capable* | Weight (g) | Price    |
|-------------|---------------|----|-----|-----|----|----|------------|-----------------|------------|----------|

### VBH... Vacuum Generator with One-Touch Fitting

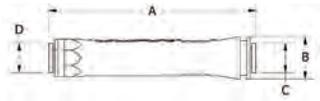

VBH... Vakuumgeneratoren mit Schnellverschlusskupplungen  
VBH... 真空発生器

- Compact lightweight vacuum generator
- Built in muffler to reduce noise
- "S" version comes with NO/NC vacuum switch
- 6mm one-touch tubing connection
- Can be used with PNP or NPN

|            | Supply Press (Optimal) | Vacuum Pressure (Max.) | Air Consumption   | Vacuum Flow         | Weight (g) | Price    |
|------------|------------------------|------------------------|-------------------|---------------------|------------|----------|
| VBH 10-66P | 5 bar (72 psi)         | -0.9 bar (-13.5 psi)   | 28 L/min (1 scfm) | 75 L/min (2.7 scfm) | 18         | \$38.03  |
| VBH 10-66S |                        |                        |                   |                     | 66         | \$121.33 |

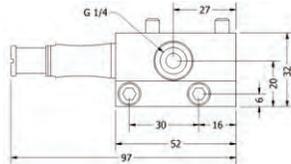

### VGI... Inline Vacuum Generator

- Compact design
- Use SI for high vacuum flow when parts are textured or porous
- Use XI for smooth parts for strong vacuume

|               | A   | B  | C | D  | Supply Pressure (Optimal) | Vacuum Pressure (Max.) | Air Consumption    | Price   |
|---------------|-----|----|---|----|---------------------------|------------------------|--------------------|---------|
| VGI 1-6-6 SI  | 70  | 15 | 6 | 6  | 6 bar (87 psi)            | -0.8 bar (-12 psi)     | 7.1 l/m (25 scfm)  | \$23.00 |
| VGI 1-6-6 XI  | 70  | 15 | 6 | 6  | 5 bar (72.5 psi)          | -0.9 bar (-13 psi)     | 8.6 l/m (.3 scfm)  | \$23.00 |

\* Available Si version only.

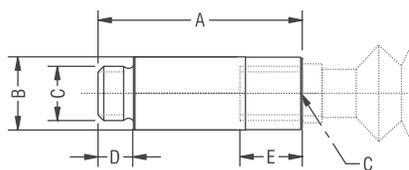

- Integrated three-stage vacuum cartridge - MINI - with extra high initial vacuum flow.
- Large vacuum flow in relation to energy consumption. Good for handling porous materials or if surface leakage is present.
- Recommended for high speed applications.
- Comes with hardware for mounting directly to SAS aluminum profiles

|                              | Weight (g) | Price    |
|------------------------------|------------|----------|
| GFD 1/4 MINI Vacuum Manifold | 133        | \$154.50 |

### VCV... Vacuum Check Valve

VCV... Strömungsventil  
VCV ... チェックバルブ

|         | A  | B  | C      | D   | E  | Weight (g) | Price   |
|---------|----|----|--------|-----|----|------------|---------|
| VCV 1/8 | 36 | 13 | G 1/8" | 6.5 | 11 | 9          | \$35.69 |
| VCV 1/4 | 38 | 18 | G1/4"  | 8.5 | 11 | ~          | \$29.00 |

- Closes automatically if attached vacuum cups fail to secure the part, thus ensuring the efficiency of the remaining cups
- Inserted between the cup and the mounting arm

## RC... Compact Air Regulator

RC... Kompakter Druckluftregler

RC... ミニチュアレギュレーター

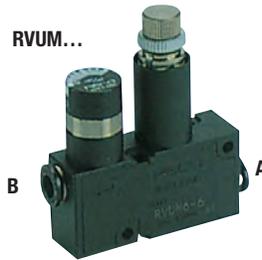

- Compact air regulator
- Maximum inlet pressure of 1.0 MPa
- Operating temperature range of 5-60°C

| Model No.    | Pipe size | Pressure Range (MBars) | Pressure Range (psi) | Price   |
|--------------|-----------|------------------------|----------------------|---------|
| R31-100-0000 | Rc 1/8"   | 0.2~7                  | 2.9~102              | \$56.00 |

GRZ 20-16

- Bullet nose design for jaw spring protection
- Single action spring return function
- Fully compatible with SAS's modular EOAT/gripper system
- Available with standard jaws, radiused jaws (KT-Type), standard mounting holes (A-Type), aggressive saw teeth (S-Type), and sensor capable jaws (C-Type)
- In-jaw part sensor does not require adjustment (C-Type only)
- T type has knurled teeth in the jaws
- RT-Type has knurled teeth in the jaws without holes, allowing for a larger gripping surface
- Now with interchangeable Jaw Kits

## GRZ... Jaw Kits

2-Zangenbacken

- Comprised of one jaw, one spring, and one jaw screw
- Can easily configure and interchange jaw types of the same size sprue plier, allowing easy adaptation to any gripping requirements
- MTL "Medium Thread Locker" required
- Customer must choose sensor type NPN or PNP
- GRZ 20-16 C includes with sensor
- GRZ 20-16 LC includes with sensor

| Size          | Description                            | Price   |

## GRF... Gripper Finger (Spring Return)

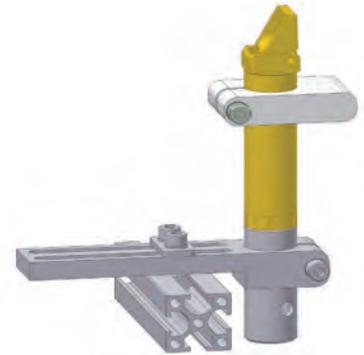

GRF... Greiffinger (doppelt wirkend)  
GRF...フィンガーアタッチメント(スプリングリターン方式)

GRF-95

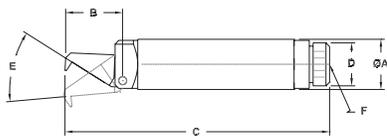

- Our popular gripper finger solution to secure difficult parts
- Normally is protected and located with our ZTS and backed-up with the ANF finger guide.
- Pneumatically single acting, spring return function
- Extendable for longer reach using VLR Arm Extensions
- Fully compatible with SAS's modular EOAT gripper system

|           | A  | B  | C   | D       | E (Degrees) | F      | Force (N) | Weight (g) | Price    |
|-----------|----|----|-----|---------|-------------|--------|-----------|------------|----------|

GRF-35

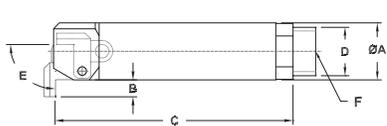

- Finger claw that securely flips & reaches around the part
- Especially designed for difficult part-removal applications
- Pneumatically single acting, spring return function
- Extendable for longer reach using VLR Arm Extensions
- Fully compatible with SAS's modular EOAT gripper system

|           | A  | B    | C   | D       | E (Degrees) | F      | Force (N) | Weight (g) | Price    |

- Provides accuracy of +/- .02mm
- Sized to fit your End-of-Arm Tool robot and mold
- Locators can dock on existing mold locators
- Custom lengths, strokes and diameters available

## IDG... Internal Diameter Gripper

IDG 16...Innengreifer

The IDG grips and releases on command and is highly recommended for manipulating breakable parts as well as heavy parts. Unlike standard clamps, the IDG distributes force evenly over the entire contact area which is why they are most often used for irregular shaped parts.

The IDG is a cost effective solution when compared to bladder grippers and automated or magnetic clamps.

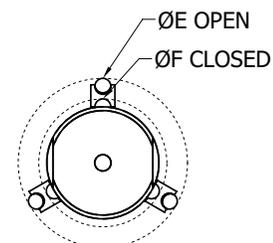

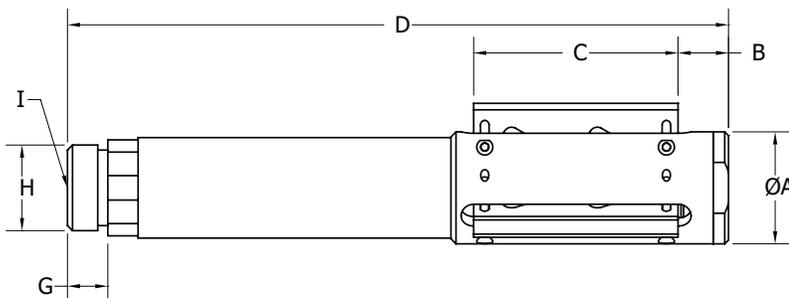

### IDG 16...

#### Features

- Single acting spring return internal diameter gripper.
- 2 ID ranges with the same body; secures 26-32mm and 32-38mm.
- Requires one compressed air line; spring return.
- Extremely strong for its size -- jaws exert 40 N force at 6 bar.
- Ø1/8" Neoprene rubber cord stock inserts ensure a secure grip – and can be replaced at low cost. Other elastomers can be used and are commercially available.
- Nose adapter can easily be customized for locating or part stabilization.

\* See "Sensors, Connectors, and Accessories" section for sensor specifications and offerings.

## GRM...Magnetic Gripper

GRM...Magnetgreifer

Magnetic Grippers are ideal for use where vacuum cups and grippers are typically used for lifting and moving steel sheets, blanks, stamped parts and complete assemblies.

### Applications and Benefits:

- Automated press to press transfer systems
- Robotic "Pick & Place"
- Manual and automated machine loading/unloading
- Outlasts vacuum cups in most applications
- Grasps odd shaped or perforated parts
- Increases production and reduces shop air costs
- Designed for long, maintenance-free operation
- Operates effectively in any orientation
- Will not drop parts if system air-loss occurs
- De-stacks without double-blanking when the appropriate magnet is selected for the application
- Reduces noise
- Maximum operating temperature 140°F (60°C)

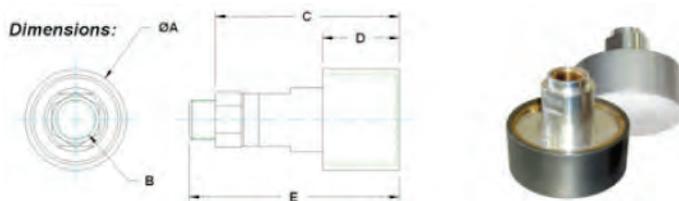

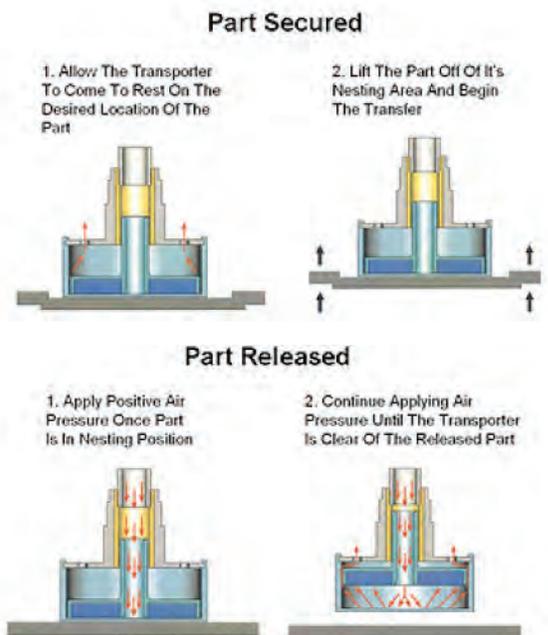

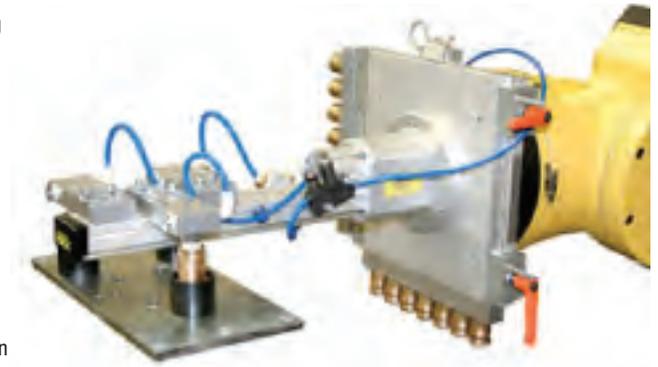

### Low Profile Magnetic Grippers:

The Magnetic Gripper is designed to directly replace vacuum cups with minor tooling and valving adjustments. Powerful Rare Earth magnets positively hold the parts during transfer, greatly reducing the chance of slipping and shifting of your part due to oily coatings. An optional "low-skid" boot is also available to increase grip on parts during transfer. A short burst of shop air pressure is applied in order to release parts. To pick-up or grip parts, the air pressure must be exhausted to the atmosphere.

- Powerful Rare Earth magnet positively holds parts - no dropping or shifting in the event of air loss
- Can be used with standard SAS parts and framework
- Lightweight, low-profile design for minimal die clearance
- Instantaneous pick-up and release
- Uses up to 95% less air than vacuum cups

### NOTE:

Supply air pressure must not exceed 60 PSI at the Magnetic Gripper inlet. Operating at pressures above 60 PSI will lead to premature failure of the unit. Air must be clean, dry and non-lubricated. Air pressure should never be applied to the Magnetic Gripper during a transfer cycle. This will cause the loss of a part. Apply air when in position to release the part. In some applications, air may need to be applied to retract the magnet before contacting the part. If the magnet "reach out" lifts the part from the guides before making contact, causing loss of part position, apply air to the Magnetic Gripper prior to lifting the part.

| Part #      | A   | B     | C   | D  | E   | Weight (g) | Price     |
|-------------|-----|-------|-----|----|-----|------------|-----------|
| GRM 38-3/8  | 38  | G3/8" | 74  | 32 | 85  | 269        | \$ 282.00 |
| GRM 76-3/8  | 76  | G3/8" | 76  | 32 | 85  | ~          | \$ 282.00 |
| GRM 127-3/8 | 127 | G3/8" | 111 | 50 | 122 | ~          | \$ 541.00 |

## GRB... Black Urethane Boot

| Part #  | Non-Skid Covers                     | Weight (g) | Price   |
|---------|-------------------------------------|------------|---------|
| GRB 38  | Black Urethane Boot for GRM 38-3/8  | 13         | \$21.00 |
| GRB 76  | Black Urethane Boot for GRM 76-3/8  | ~          | \$21.00 |
| GRB 127 | Black Urethane Boot for GRM 127-3/8 | ~          | \$21.00 |

Low Skid Boots protect against marring of class "A" blanks while extending the life of the magnet by protecting the face from wear. In many applications the boots and pads also assist in keeping parts from shifting under shear in transport. The boots cover the edge of the cup for complete blank protection while the pads cover the face of the cup for increased wear protection to extend the life of the magnet.

\*SAS Automation will match any competitor's price for stock components with proper verification.

## VLR... Arm Extension

VLR... Verlängerungsrohr  
VLR...フィンガー延長部品

- Extends GRF and GRW gripper fingers
- Attaches to ADZ and ADG cylinder adapters and to ZTB locators
- Tightening hole for securing connection to mating parts

|                   | A  | B       | C   | Weight (g) | Price   |
|-------------------|----|---------|-----|------------|---------|
| <b>VLR 10-90</b>  | 10 | M8 x 1  | 90  | 9          | \$6.75  |
| <b>VLR 14-120</b> | 14 | M12 x 1 | 120 | 19         | \$6.75  |
| <b>VLR 20-150</b> | 20 | M17 x 1 | 150 | 46         | \$8.75  |
| <b>VLR 30-200</b> | 30 | M27 x 1 | 200 | 94         | \$14.00 |

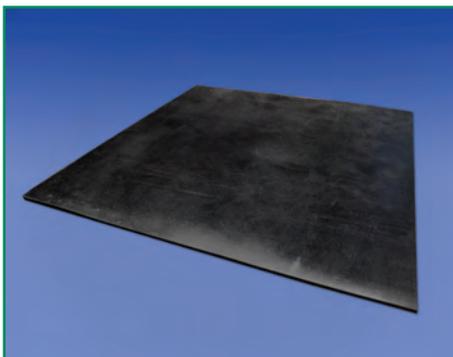

## LIA 380-1... Instant Adhesive

- Strong Super Glue for the SPU 3-250
- Excellent resistance to peeling, impact, and temperature changes
- Apply to a clean dry surface

|                  | Price   |
|------------------|---------|
| <b>LIA 380-1</b> | \$68.00 |

## SPU 3-250... Polyurethane Sheet

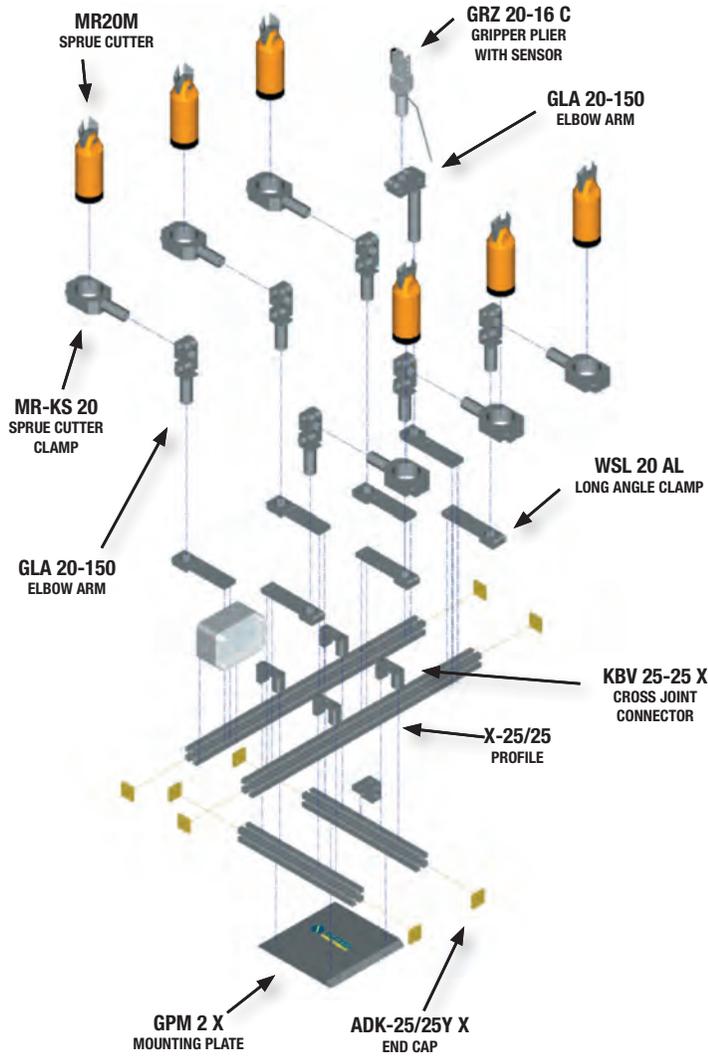

- 250x250x3 Polyurethane Sheet
- Used to adhere to custom gripper jaws to protect workpiece, cut to size
- Excellent abrasion resistance
- Durometer 40A
- Temperature Range: -29° to 85° C (-20° to +185° F)

|                  | Price   |
|------------------|---------|
| <b>SPU 3-250</b> | \$78.00 |

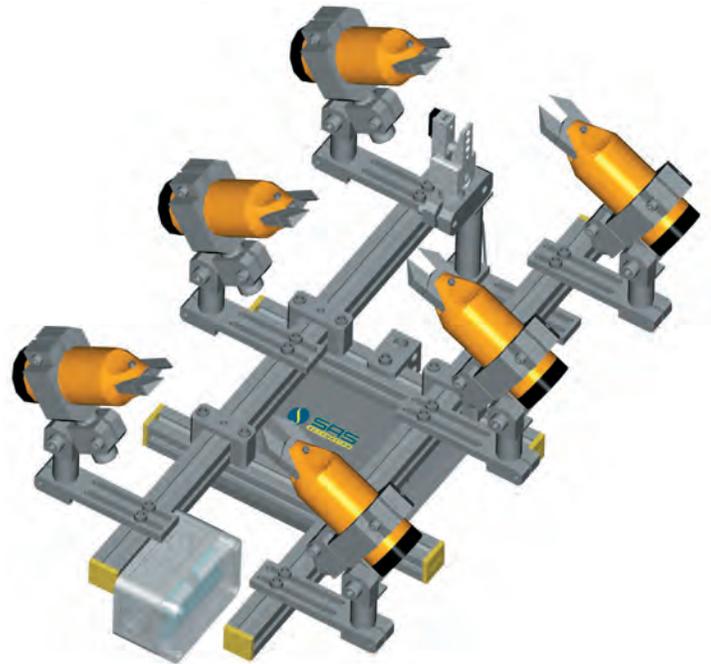

# DEGATING CUTTERS, BLADES AND ACCESSORIES

Filmangußschneider, Angußschneider, Schneideinsätze

Sprue Cutter  
Station Degater

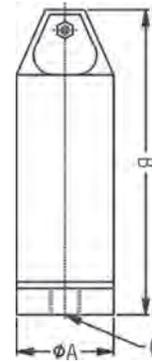

## MR... Sprue Cutter

- Automatic Type is fixture mountable
- Hand operated features a safety lever
- Standard and special blades available (see Nip-It! section for Type-I blade information)

MR... Angusschneidzange  
MR... エアニツパー

\* Soft Plastics are PP & PE \*\* Hard Plastics are ABS, Polycarbonates, Acrylic resin, POM & PS

- Square body with mounting holes on all four sides
- MSP-Type has a pressure booster
- Blades sold separately

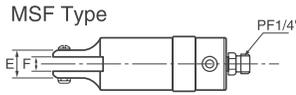

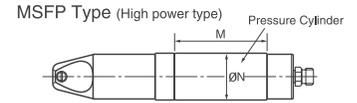

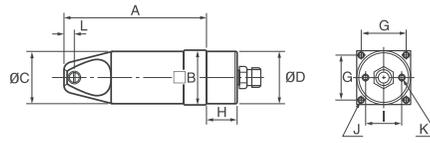

\*Blades sold separately

\*SAS Automation will match any competitor's price for stock components with proper verification.

## MSF/MSFP... Lightweight Square Type/High Power Square Type

MSF... Quadratischer Typ /  
MSFP... Hochleistungs Typ  
MSFPタイプ (角型・増圧タイプ)

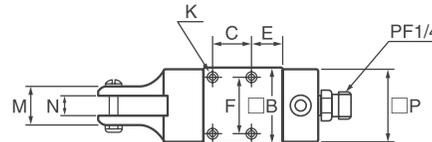

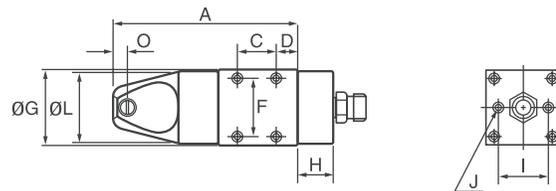

- Cylindrical body with a mounting flange
- Useful for table mounting where a low profile is necessary
- MSFP-Type has a pressure booster
- Blades sold separately

\*Blades sold separately

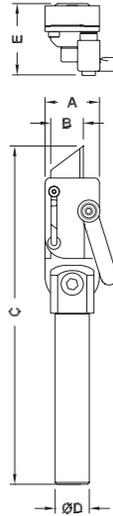

## GCK... Adjustable Gate Cutting Knife

GCK... Filmanguss-Schneidmesser verstellbar

GCK... 可調節ゲート切断用ナイフ

- Easily mounts to standard mounting clamps
- Lightweight for maximum efficiency in cutting applications
- Elbow arm allows for fine adjustment of cutter blade

| Adjustable Cutting Knife | A  | B  | C   | D  | E  | Price    |
|--------------------------|----|----|-----|----|----|----------|
| GCK 20-150               | 32 | 19 | 198 | 20 | 42 | \$129.03 |

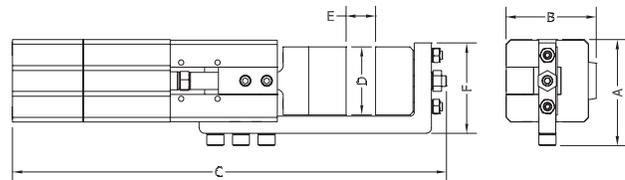

## TCN... Thrust Cutter Nipper

TCN... Druckangussschneider

TCN... スラストカッターニッパ

- Blade positioned at 45° angle
- Actuated guillotine motion allows for access to hard-to-reach areas

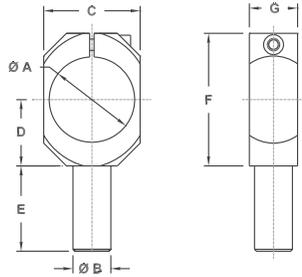

| Thrust Cutter Nipper | A  | B  | C   | D  | E  | F  | Price      |
|----------------------|----|----|-----|----|----|----|------------|
| TCN 63               | 99 | 84 | 405 | 64 | 28 | 85 | \$1,575.00 |

## MR-KS... Standard Sprue Cutter Clamp

MR-KS...Klemmstück für Angusschneidzange  
MR-KS... エアニッパークランプ

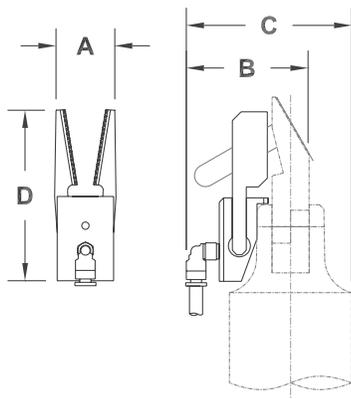

- Adjustable clamp for the cutter body
- Mounts any 20 series gripper mounting arms and mounting clamps, including GLA's, WKA's, WSL's, and WST's

|          | A  | B  | C  | D  | E  | F   | G  | Sprue Cutter | Weight (g) | Price   |
|----------|----|----|----|----|----|-----|----|--------------|------------|---------|
| MR-KS 10 | 36 | 20 | 45 | 22 | 45 | 51  | 25 | MR 10 A      | 92         | \$42.25 |
| MR-KS 20 | 45 | 20 | 51 | 35 | 45 | 70  | 25 | MR 20 A      | 132        | \$42.50 |
| MR-KS 30 | 56 | 20 | 64 | 40 | 45 | 80  | 25 | MR 30 A      | 168        | \$47.25 |

## MR-AH... Sprue Holder

MR-AH... Angusshalter  
MR-AH... スプルーホルダー

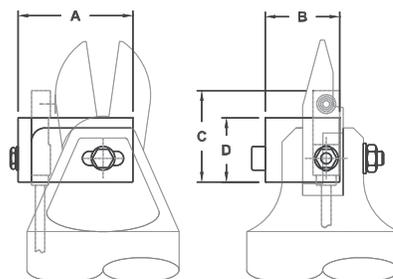

- New compact design for tight applications
- Efficiently mounts to cutter body
- Normally connected to nipper supply line for single pneumatic operation

|          | A  | B  | C  | D  | Sprue Cutter | Weight (g) | Price    |
|----------|----|----|----|----|--------------|------------|----------|
| MR-AH 20 | 18 | 47 | 81 | 66 | MR 20 A      | ~          | \$167.25 |
| MR-AH 30 | 18 | 37 | 75 | 66 | MR 30 A      | 119        | \$129.00 |
| MR-AH 50 | 18 | 37 | 93 | 67 | MR 50 A      | 104        | \$129.00 |

## MR-SH... Sprue Cutter Sensor Kit

MR-SH... Angusshalter  
MR-SH.スプルー・カッター・センサー用具一式

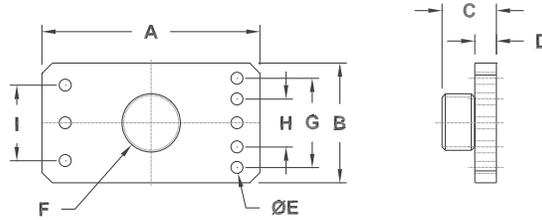

- Ensures blade is open and assures part clearance
- Adjustable for use with F5, F5A, F5S, F5U1, F5NR279, and F5XR325 blades

|          | A  | B  | C  | D  | Sprue Cutter | Sensor          | Weight (g) | Price   |
|----------|----|----|----|----|--------------|-----------------|------------|---------|
| MR-SH 20 | 34 | 22 | 27 | 19 | MR 20 A      | SP 1.5 / SN 1.5 | 47         | \$90.00 |

## ME-HP... Adapters for ASZ-ME Cutters

ME-HP... Halteplatte für Angusserschneidzange  
ME-HP... タイプエアニッパ-用アダプター

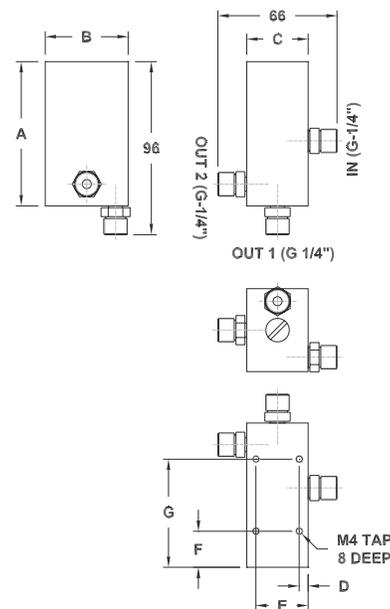

- Allows ME sprue cutters to attach to standard VLR Arm Extensions and mount in standard mounting clamps

|              | A   | B  | C  | D | E   | F       | G  | H  | I  | Cutter    | Extension | Price   |
|--------------|-----|----|----|---|-----|---------|----|----|----|-----------|-----------|---------|
| ME-HP 3/5/10 | 63  | 35 | 16 | 6 | 3.5 | M17 X 1 | 26 | 14 | 22 | ME 3/5/10 | VLR 20-L  | \$31.75 |
| ME-HP 20/30  | 100 | 51 | 16 | 6 | 4.5 | M27 X 1 | 34 | ~  | 40 | ME 20/30  | VLR 30-L  | \$32.25 |

## TU-01... Timing Unit

TU-01...Zeitrelais  
TU-01... タイミング単位

- Out 1 Port fires first and is intended to control the slide or tilt motion of the cutter body
- Out 2 Port fires after a short delay and is intended to control the blade
- Delay between port firing is adjustable to suit specific applications
- Port Size G 1/4"

|       | A  | B  | C  | D | E  | F  | G  | Price    |
|-------|----|----|----|---|----|----|----|----------|
| TU-01 | 80 | 46 | 34 | 5 | 20 | 20 | 60 | \$125.00 |

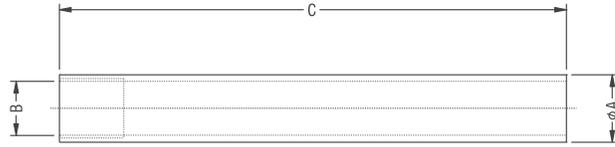

### VLR... Arm Extension

VLR... Verlängerungsrohr  
VLR...フィンガー延長部品

- Extends GRF and GRW gripper fingers
- Attaches to ADZ and ADG cylinder adapters, ME-HP cutter adapters, and ZTB locator pins
- Tightening hole for securing connection to mating parts

|                   | A  | B       | C   | Weight (g) | Price   |
|-------------------|----|---------|-----|------------|---------|
| <b>VLR 10-90</b>  | 10 | M8 x 1  | 90  | 9          | \$6.75  |
| <b>VLR 14-120</b> | 14 | M12 x 1 | 120 | 19         | \$6.75  |
| <b>VLR 20-150</b> | 20 | M17 x 1 | 150 | 46         | \$8.75  |
| <b>VLR 30-200</b> | 30 | M27 x 1 | 200 | 94         | \$14.00 |

### WF... Work Finisher

WF... Entgratungsmesser Workfinisher aus Keramik  
WF...セラミック製バリ取りハンドツール ワークフィニッシャー

- Space age ceramics make safe deburring possible with Work Finisher's unique non-blade like edge.
- Deburrs hard plastics effortlessly without cutting hands and fingers
- Ideal for curved and complicated shapes
- Excels on ultra-hard resins like glass-fiber, carbon-fiber, and talc filled plastics

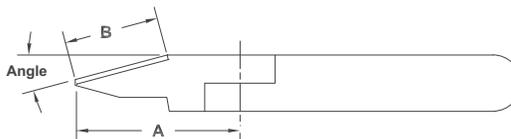

|                | Blade Length | Overall Length | Blade Thickness | Weight (g) | Price   |
|----------------|--------------|----------------|-----------------|------------|---------|
| <b>WF-1540</b> | 40           | 130            | 10              | 52         | \$26.83 |
| <b>WF-620</b>  | 25           | 105            | 6               | 22         | \$22.63 |

# Category I Standard Blades

Schneideinsätze Typ I  
ファミリー 1 ブレード

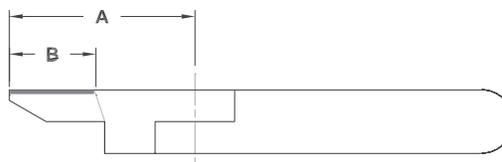

## F\* Type

- Can be used on MR, ML, MSR, CF, MS/MSP, SC, MSF/MSFP, MSK, SMR cutters

| Blade No. | A (Pivot Location) | B (Edge Length) | C (Blade Opening) | Blade Angle | Cutter Body Size | Weight (g) | Price   |
|-----------|--------------------|-----------------|-------------------|-------------|------------------|------------|---------|
| F10       | 24                 | 12              | 2.5               | 15°         | 3                | ~          | \$48.56 |

ソブシリンダおよび付属部品

## IRK & RRK... Cylinder Sensor

IRK & RRK... Zylindersensoren  
IRK、RRK... センサー

- Sensors with or without connectors
- 2-Wire Reed switch sensors have higher voltage resistance capability
- 3-Wire Solid State Switches have faster reaction time

## LRS & LES... Optical Sensors

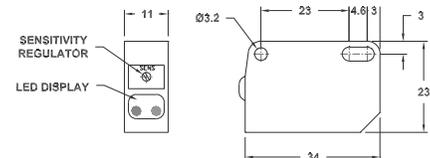

LRS & LES... Teilesensoren  
LRS & LES... 光学センサー

- Long sensing range
- Provides part present sensing for parts when vacuum sensors can't be used due to thin material
- LES sensor can be used with standard mounting clamps when attached to a GGE 14-80 FB
- LRS sensor has round shape and includes jam nuts for plate mounting

LES-5

|         | Sensor Type        | Supply Voltage (VDC) | Sensing Range (mm) | Cable Length | Wires | Quick Connector | Output | Weight (g) | Price    |
|---------|--------------------|----------------------|--------------------|--------------|-------|-----------------|--------|------------|----------|
| LES-5   | Diffuse Reflective | 10-30                | 30-300             | 2m           | 3     | ~               | PNP    | 86         | \$109.00 |

## SEO & GEO... Mechanical Sensors

SEO & GEO... Teilesensoren (mechanisch)  
SEO & GEO... 物理センサー

- Provides part present sensing when vacuum sensors can't be used and a short sensing range is necessary
- SEO sensor can be used with standard mounting clamps when attached to a GGE 14-80 FB
- GEO houses and protects an SEO's terminals

|               | Description                   | Max. Supply Voltage    | Wires | Output | Weight (g) | Price   |
|---------------|-------------------------------|------------------------|-------|--------|------------|---------|
| <b>GEO-10</b> | Terminal Enclosure for SEO 10 | ~                      | ~     | ~      | 15         | \$7.70  |
| <b>SEO-5</b>  | Mechanical Switch             | 125 VDC (0.1A)/125 VAC | 2     | ~      | 18         | \$5.13  |
| <b>SEO-10</b> | Mechanical Switch             | 125 VDC (0.1A)/125 VAC | 2     | ~      | 32         | \$15.25 |

## DSD... Double Sheet Detector

| Description                             | Price     |
|---|-----------|
| DSD-36 Control Module                   | \$2892.75 |
| DSD-36 Double Sheet Sensor              | \$949.75  |
| DSD-36 Spring Loaded Mounting Bracket   | \$505.25  |
| DSD-36 Cable; 8 Conductor 5 Meters Long | \$110.20  |

- Detects the thickness of ferrous metals on the face of the sensor using pulsed electromagnetic detection.
- Permits double sheet/blank detection with minimal magnetic attraction of the sheet.
- Controller, Sensor, Mounting Bracket, and Cable sold separately.
- Can detect sheets with min thickness of .25mm to a max of 2.3mm.
- Standard SAS mounting arm mounts to standard clamps.

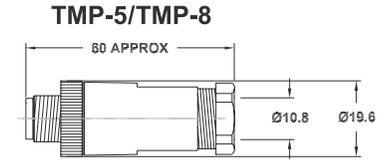

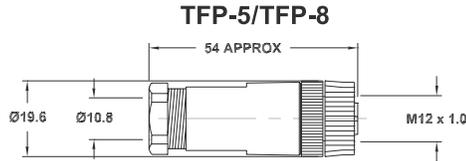

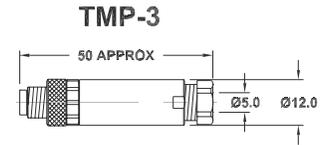

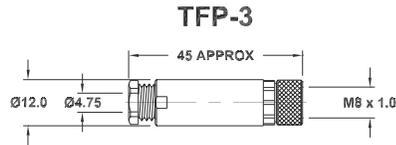

## TFP & TMP... Electrical Connectors

TFP & TMP... Steckverbinder  
TFP & TMP... 電気プラグ

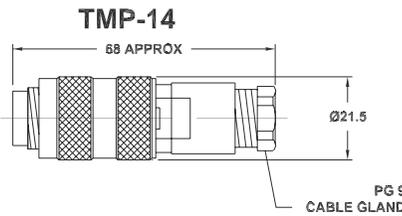

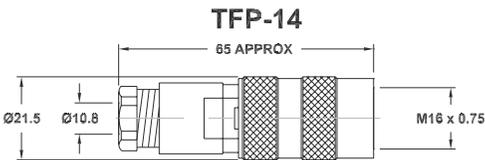

- Field wireable screw down terminal cable ends
- No soldering required

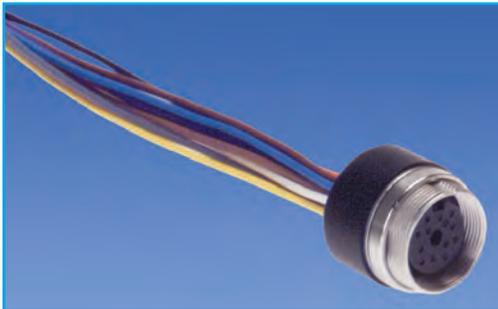

| Female        |                |      |         |
|---------------|----------------|------|---------|
|               | Connector Size | Pins | Price   |
| <b>TFP-3</b>  | M8             | 3    | \$18.06 |
| <b>TFP-5</b>  | M12            | 5    | \$25.60 |
| <b>TFP-8</b>  | M12            | 8    | \$27.50 |
| <b>TFP-14</b> | M16            | 14   | \$39.90 |

| Male          |                |      |         |
|---------------|----------------|------|---------|
|               | Connector Size | Pins | Price   |
| <b>TMP-3</b>  | M8             | 3    | \$18.06 |
| <b>TMP-5</b>  | M12            | 5    | \$25.60 |
| <b>TMP-8</b>  | M12            | 8    | \$27.50 |
| <b>TMP-14</b> | M16            | 14   | \$39.90 |

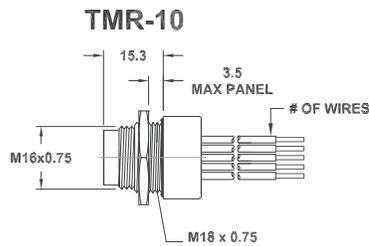

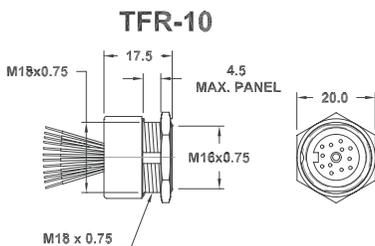

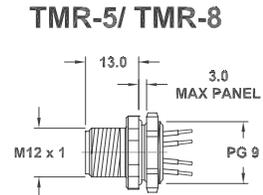

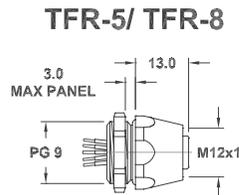

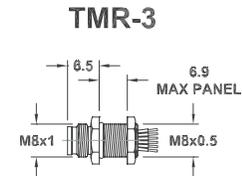

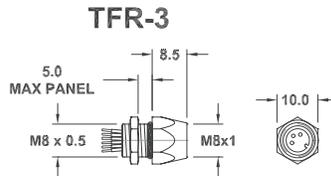

## TFR & TMR... Bulkhead Electrical Receptacles

TFR & TMR... Elektronischer Schraubeinsatz  
TFR & TMR... パルクヘッド電気リセプティカル

- Field wireable receptacles with wire leads
- Add a quick disconnect for home run and sensor cables to any tool
- No soldering required

| Female        |                |      |             |            |         |
|---------------|----------------|------|-------------|------------|---------|
|               | Connector Size | Pins | Lead Length | Weight (g) | Price   |
| <b>TFR-3</b>  | M8             | 3    | 500mm       | 14         | \$14.04 |

## PJB... Junction Boxes

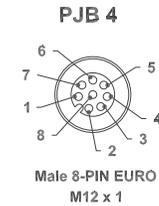

PJB... Signalmehrfachverbinder  
PJB... センサ ロジック

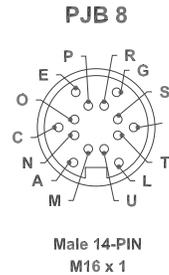

- AND logic (AJB) and Pass-Through (PJB) Junction Boxes with screw in terminals
- Works with PNP or NPN sensors
- Compact design for easy mounting on almost any tool
- Female input connectors
- Male output connectors

| PJB 4/ PJB 8 Female Pinout |     |
|----------------------------|-----|
| Function                   | Pin |
| +V                         | 1   |
| -V                         | 3   |
| Signal                     | 4   |

| PJB 4 Male Pinout |     |                      |
|-------------------|-----|----------------------|
| Function          | Pin | Wire Color (FW8-...) |
| +V                | 5   | Gray                 |
| -V                | 7   | Blue                 |
| Port 1            | 1   | White                |
| Port 2            | 2   | Brown                |
| Port 3            | 3   | Green                |
| Port 4            | 4   | Yellow               |

| PJB 8 Male Pinout |     |                       |
|-------------------|-----|-----------------------|
| Function          | Pin | Wire Color (FW10-...) |
| +V                | M   | Brown                 |

## KK & RPL... Wiring Sample Diagrams

KK & RPL... Schaltungsbeispiele  
KK & RPL... 配線実例図

The KK2 type is available with 8 I/O's.

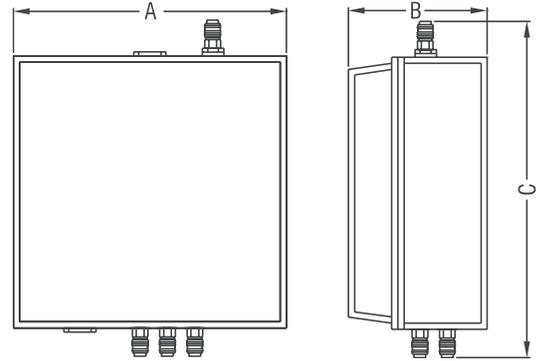

If all the inputs are not used in an RPL the unused inputs must be wired. (see chart to the right)

RVB... Robot Valve Box

RVB... Roboter-Ventilanschlussbox

ロボット取付用真空ボックス

- 24 VDC solenoid valves
- Vacuum ejectors & valves
- Air regulator, used to achieve maximum vacuum levels
- Innovative vacuum check valve keeps parts on the EOAT in case of temporary loss of power or air
- 24 VDC vacuum confirmation switches
- Vacuum blow-off solenoid valves control the check-valves and blow-off features
- Standard extra wiring terminals allow EOAT sensors to be wired to the robot through the Valve Box
- Smart junction boards, used for robotic interfacing and effective troubleshooting, include LED's for monitoring I/O's and power supply
- One touch pneumatic fittings and field wireable electrical connectors make the box easy to adapt to different EOAT's and robots

|                    | Air Circuits | Vacuum Circuits | Additional Thru I/O's | A   | B   | C   | Price      |
|--------------------|--------------|-----------------|-----------------------|-----|-----|-----|------------|

\* U42 Valve Boxes (Exp: RVB 2-2 U42), are upgradeable to 4 air and 2 vacuum circuits

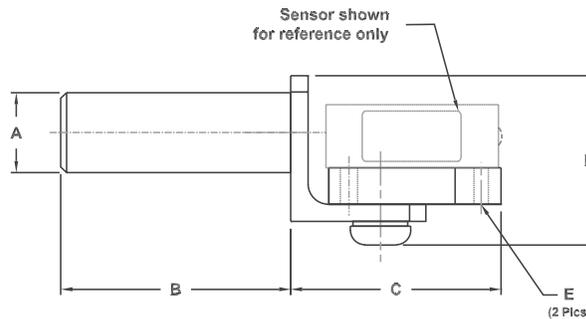

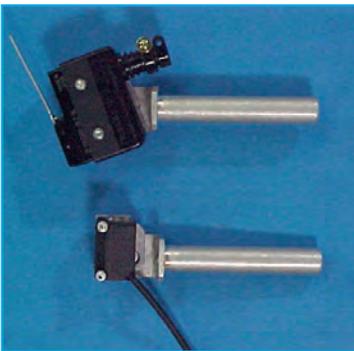

| RVB Upgrade Kits* |  |  |  |          |
|-------------------|--|--|--|----------|
| <b>RVB A1</b>     | Allows one additional air circuit to be added to a previously purchased RVB-Valve Box    |  |  | \$260.00 |
| <b>RVB V1</b>     | Allows one additional vacuum circuit to be added to a previously purchased RVB-Valve Box |  |  | \$680.00 |

\* RVB Upgrade Kits include all necessary fittings and accessories.

GGE...-F Sensor Gripper Arm

GGE...-F Gelenkgreifarm für Sensor

GGE...-F エルボーハンドアーム

- Allows LES and SEO sensors to mount to standard mounting clamps

|                      | A  | B   | C  | D  | E  | Sensor (sold separately) | Weight (g) | Price   |
|----------------------|----|-----|----|----|----|--------------------------|------------|---------|
| <b>GGE 14-120-FB</b> | 14 | 120 | 28 | 25 | M3 | LES-5.../SEO 10          | 54         | \$35.25 |

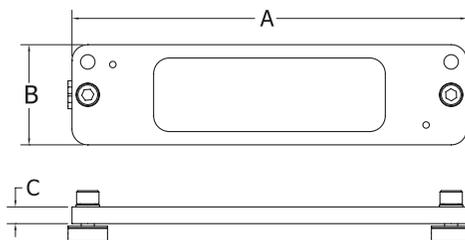

## JBM... Junction Box Mount

JBM... Befestigung für RPL

|              | A   | B  | C | Weight (g) | Price   |
|--------------|-----|----|---|------------|---------|
| <b>JBM 4</b> | 118 | 44 | 7 | 75         | \$25.52 |
| <b>JBM 8</b> | 150 | 38 | 7 | 73         | \$26.25 |

- Gives the ability to mount PJBs to profile.

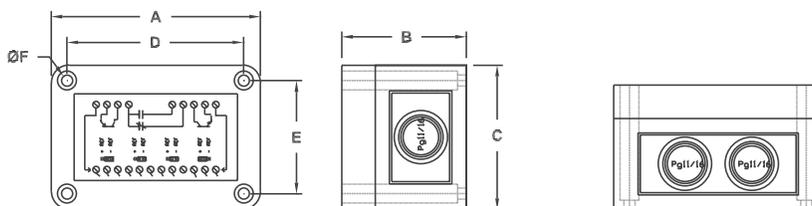

## J-Box... Sensor Logic Box

J-Box... Klemmkasten für Sensorsteuerung

J-BOX... センサ ロジック/PNP-NPN コンバータジャンクション ボックス

- Minimize interface wiring and maximize utilization of controller inputs by providing termination/ power distribution points for up to 8 inputs.
- Inputs/ Outputs can be either current sourcing (PNP), sinking (NPN), or a combination of the two
- Includes enclosure and cable grips
- Accessible terminals allow for easy wiring
- May be installed into "Snap Track" on DIN mounting
- Solid State logic for long life
- KK's provide "Pass Through" functionality
- RPL's provide "AND" Logic functionality
- RPL can convert PNP signals to NPN and NPN signals to PNP
- US PAT. #6,812,593

## WLS... Long Angle Connector

WLS... Winkelstück (lang)  
WLS... ロングアングルコネクタ

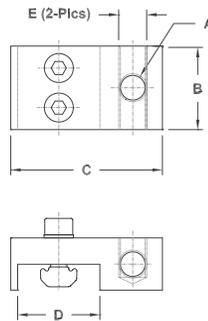

- Allows for low-profile height by mounting vacuum cups directly to the frame
- Adjusts parallel & perpendicular to the profile
- Extra port can connect vacuum to another cup

|                | A      | B  | C  | D  | E      | F | G  | Profile   | Weight (g) | Price   |
|----------------|--------|----|----|----|--------|---|----|-----------|------------|---------|
| <b>WLS M5</b>  | M5     | 16 | 16 | 45 | M5     | 6 | 13 | L/X       | 28         | \$13.88 |
| <b>WLS 1/8</b> | G 1/8" | 25 | 23 | 57 | G 1/8" | 8 | 16 | X/HX/D    | 68         | \$18.25 |
| <b>WLS 1/4</b> | G 1/4" | 25 | 23 | 57 | G 1/8" | 8 | 16 | X/JX/HX/D | 67         | \$18.25 |

## WSS... Angle Connector

WSS... Winkelstück  
WSS... アングル コネクタ

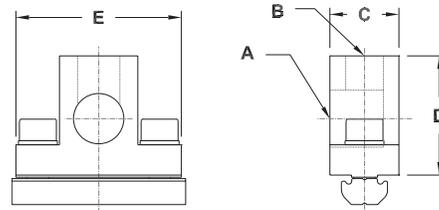

- Allows for low profile height by mounting vacuum cups directly to the frame profile
- Adjustable along the channel of the frame profile
- Extra port can connect vacuum to another cup

|                  | A      | B  | C  | D  | E      | Profile | Weight (g) | Price   |
|------------------|--------|----|----|----|--------|---------|------------|---------|
| <b>WSS M5 L</b>  | M5     | 16 | 32 | 18 | M5     | L       | 18         | \$12.00 |
| <b>WSS 1/8 X</b> | G 1/8" | 25 | 46 | 25 | G 1/8" | X       | 47         | \$14.75 |
| <b>WSS 1/4 X</b> | G 1/4" | 25 | 46 | 25 | G 1/8" | X       | 47         | \$15.50 |

## SAS... Vacuum Cup Connector

SAS... Saugeranschluss (seitlich)  
SAS... 吸着パッドコネクタ

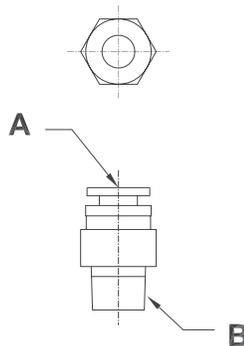

- Provides minimum profile height, allowing vacuum cups to be mounted to the side of the frame profile
- Adjustable along the channel of the frame profile

|                | A      | B      | C  | D  | E  | Profile   | Weight (g) | Price   |
|----------------|--------|--------|----|----|----|-----------|------------|---------|
| <b>SAS 1/8</b> | G 1/8" | G 1/8" | 16 | 25 | 38 | L/X/D     | 43         | \$10.75 |
| <b>SAS 1/4</b> | G 1/4" | G 1/8" | 16 | 25 | 38 | X/JX/HX/D | 42         | \$10.75 |

## H... Male Connector

H... Steckverschraubung (gerade)

H... 配管用ワンタッチ継手

- One-touch male fitting
- Fits standard female threads: BSP, BSPT, G, Rc

|            | A<br>(Tubing Size) | B<br>(Male Thread) | Weight (g) | Price   |
|------------|--------------------|--------------------|------------|---------|
| H04-M3-10  | 4                  | M3 x .5            | 22         | \$46.40 |

| AS2201F-01-06S | 6               | R 1/8"          | Meter Out | 15         | \$14.95 |
| AS2211F-01-06S | 6               | R 1/8"          | Meter In  | 15         | \$14.65 |

\* Sold Individually

## ASP... Flow Control with Pilot Check Valve

ASP... Durchflussregler mit Rückschlagventil  
ASP...パイロットチェックバルブ付き流量制御器

- One-touch flow control
- Allows for fine control of gripper and cylinder speed without loss of clamping pressure
- Can be used on inlet or exhaust ports
- Pilot Check Valve gives added security by providing a back up air supply

## TC... Tubing Cutter

TC... Schlauchschneider  
TC... チューブ・カッター

- 6 cutting edges on each blade insert
- One handed operation and cutter lock
- Integrated 1m tape measure

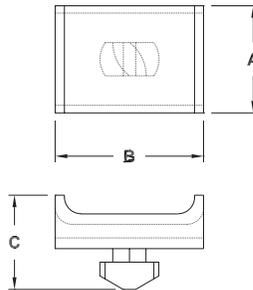

|       | Max Tubing Size | Weight (g) | Price   |
|-------|-----------------|------------|---------|
| TC-21 | 15mm / 1/2"     | 58         | \$11.00 |

## CTM... Cable and Hose

CTM... Kabel- und Schlauchbock  
CTM... ケーブルおよびホース継手

- Convenient wiring and tubing tie-down twists tightly into standard frame profile
- Easily moveable and removeable
- CTM-15 designed to fit into L, X, & D profiles
- CTM-25 designed to fit into JX & HX profiles

|        | A  | B  | C  | Weight (g) | Price   |

KITS... Five Varieties & Sizes

KITS..  
保護 用具一式

If building your own gripper seems like an enormous puzzle, then take advantage of our gripper kits. Building your own gripper has never been easier.

- Everything you need to build your EOAT
- Includes our quick change chuck system, aluminum profile, mounting arms, vacuum cups, sprue plier, gripper fingers, pneumatic fittings, tubing, and fasteners (medium gripper kit only)
- Kits B,C,D, and E will build one specific EOAT
- See below for component details

|                    | Quick Change System | Approx. Part Weight | Frame Profile    | Shaft Diameter | Part Securing Methods                | Price     |
|--------------------|---------------------|---------------------|------------------|----------------|--------------------------------------|-----------|
| Medium Gripper Kit | SWM                 | <10kg (<22lbs.)     | X-25/25, X-50/25 | 14 & 20mm      | Vacuum cups, Sprue Pliers, & Fingers | \$3642.31 |

|                                      | Profile Size | Approx. Frame Dimension (mm) | # of Vacuum Cups | # of Sprue Pliers | Tubing Diameter (OD/ID) | Price    |
|--------------------------------------|--------------|------------------------------|------------------|-------------------|-------------------------|----------|
| EOAT Kit L-18/18 without sprue plier | L-18/18L     | 250 x 350                    | 4                | 0                 | 6/4                     | \$466.43 |
| EOAT Kit L-18/18                     | L-18/18L     | 250 x 350                    | 4                | 1                 | 6/4                     | \$599.00 |
| EOAT Kit X-25/25 without sprue plier | X-25/25      | 500x650                      | 4                | 0                 | 6/4                     | \$429.00 |
| EOAT Kit X-25/25                     | X-25/25      | 500x650                      | 4                | 1                 | 6/4                     | \$629.00 |

For this example: Let's assume a plastic injection molding process

**Before building an EOAT, these robot questions must be determined. Robot Questions:**

- 1) Robot make and Model \_\_\_\_\_
- 2) Payload: \_\_\_\_\_
- 3) Attach Mounting plate pattern.
- 4) Available movement pattern: 3 –axis \_\_\_\_\_, 6 –axis \_\_\_\_\_, other \_\_\_\_\_
- 5) Reach of all axis: \_\_\_\_\_
- 6) # of Air, vacuum and electric circuits available:

**Check Molding Conditions. Mold Questions:**

- 1) Mold drawings available? \_\_\_\_\_
- 2) Daylight available \_\_\_\_\_
- 3) Distance between tie bars \_\_\_\_\_
- 4) # of and stroke of ejector pins \_\_\_\_\_
- 5) Cycle time in seconds \_\_\_\_\_
- 6) Overhead/side obstructions
- 7) Temperature of ejected part: \_\_\_\_\_°C \_\_\_\_\_°F

**After looking at mold conditions answer these questions:**

- 1) How many cavities? \_\_\_\_\_
- 2) Does the part eject easily? \_\_\_\_\_
- 3) Can vacuum cups remove the part or will mechanical grippers be necessary? \_\_\_\_\_
- 4) What type parts surface? \_\_\_\_\_ Smooth \_\_\_\_\_ textured \_\_\_\_\_ flat  
 \_\_\_\_\_ curved \_\_\_\_\_ painted \_\_\_\_\_ coated

**End-of-Arm Tool Questions:**

- 1) Will the tool be used on one specific robot and press or many?
- 2) Does the tool need to be switched quickly and stored?
- 3) Will the tool be adjustable and reuseable?
- 4) Is individual part detection needed?
- 5) Do the parts need to be cut, trimmed, or separated?
- 6) Can the parts be packaged straight from the press?
- 7) Do inserts or labels need to be placed in the mold for the next part?

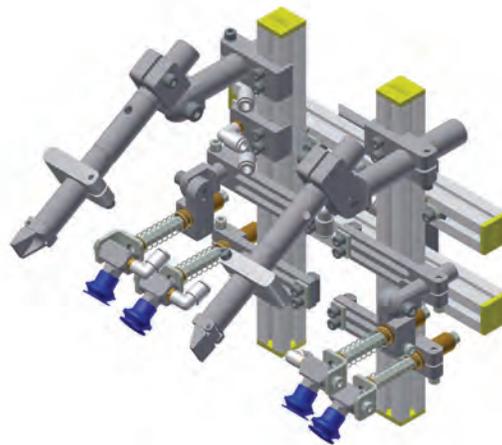

# Training

Your inquiry or order starts with superior customer service at SAS. Whether it is your first order, and you are new to End-of-Arm Tooling, or you are an experienced engineer, we will help you select the components and tooling best for your needs at a competitive price.

If you need ideas or solutions for putting tools together or setting up a manufacturing cell, just contact our experienced engineering team or technical sales staff for first class customer service.

When your situation requires that you build your own EOAT at your facility with SAS components, our skilled technicians can train you at our centrally located EOAT training site, or we will come to you.

SAS provides a compliment of robotic cells in our testing center to assist you in evaluating your EOAT requirements. This facility is also used to test End-of-Arm tools as quality assurance prior to installation.

**ROBOT INFORMATION FOR EOAT**

Circle of DDD (A) EOAT SURVEY (2)

Revision (1) 1/2011

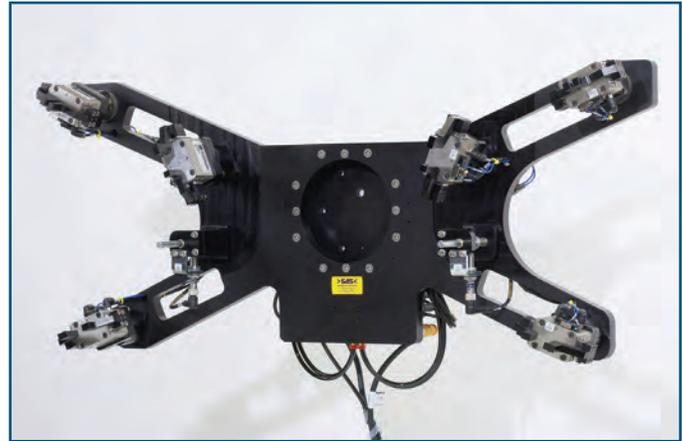

SAS Automation continuously provides prompt, courteous service from start to finish of any automation project. SAS is the only Robotic End-of-Arm Tooling company that provides this high level of service throughout every automation project.

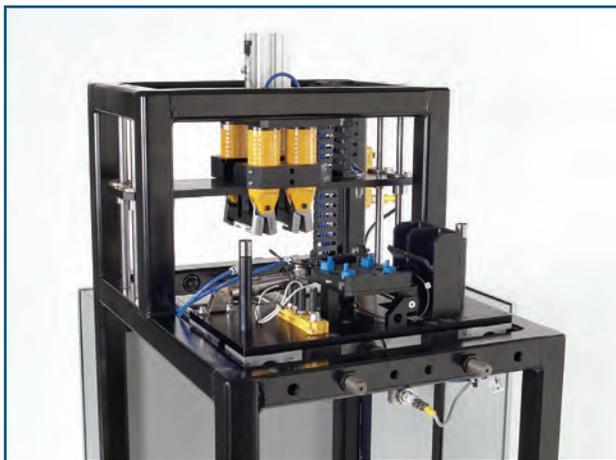

## Design & Engineering

Unlike distributors of EOAT, SAS Automation is a leading manufacturer of EOAT. The SAS difference is significant, as our design and engineering department is equipped with the latest in 3D CAD tools to custom design and build EOAT – for any robot, any part, anywhere. While others may provide basic “drawings”, only SAS provides custom engineered tools from strong, lightweight materials that increase productivity while reducing robot wear and tear. All this from the most experienced EOAT engineering team in the industry. This team includes licensed and professional engineers.

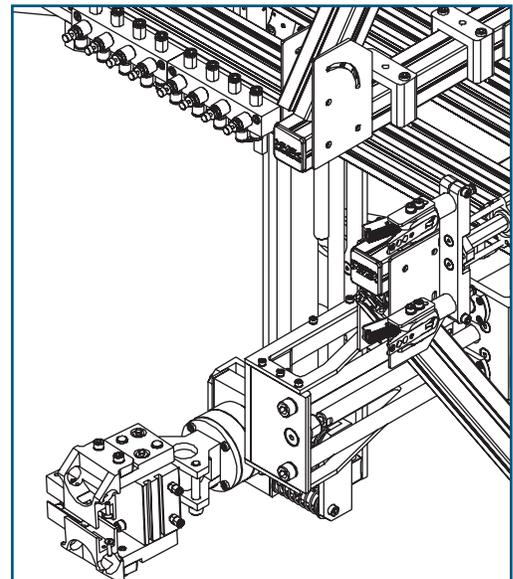

No company has more experience when it comes to designing gripper systems to make your robot grip, hold, locate, inspect, move, lift, release, and handle your part in a repeatable fashion. Whether your needs are to pick and place a part from the mold or to provide an automation cell, SAS has the technical talent to meet your needs. Our primary business is designing gripper systems that enable your robot to do more, so you can do less.

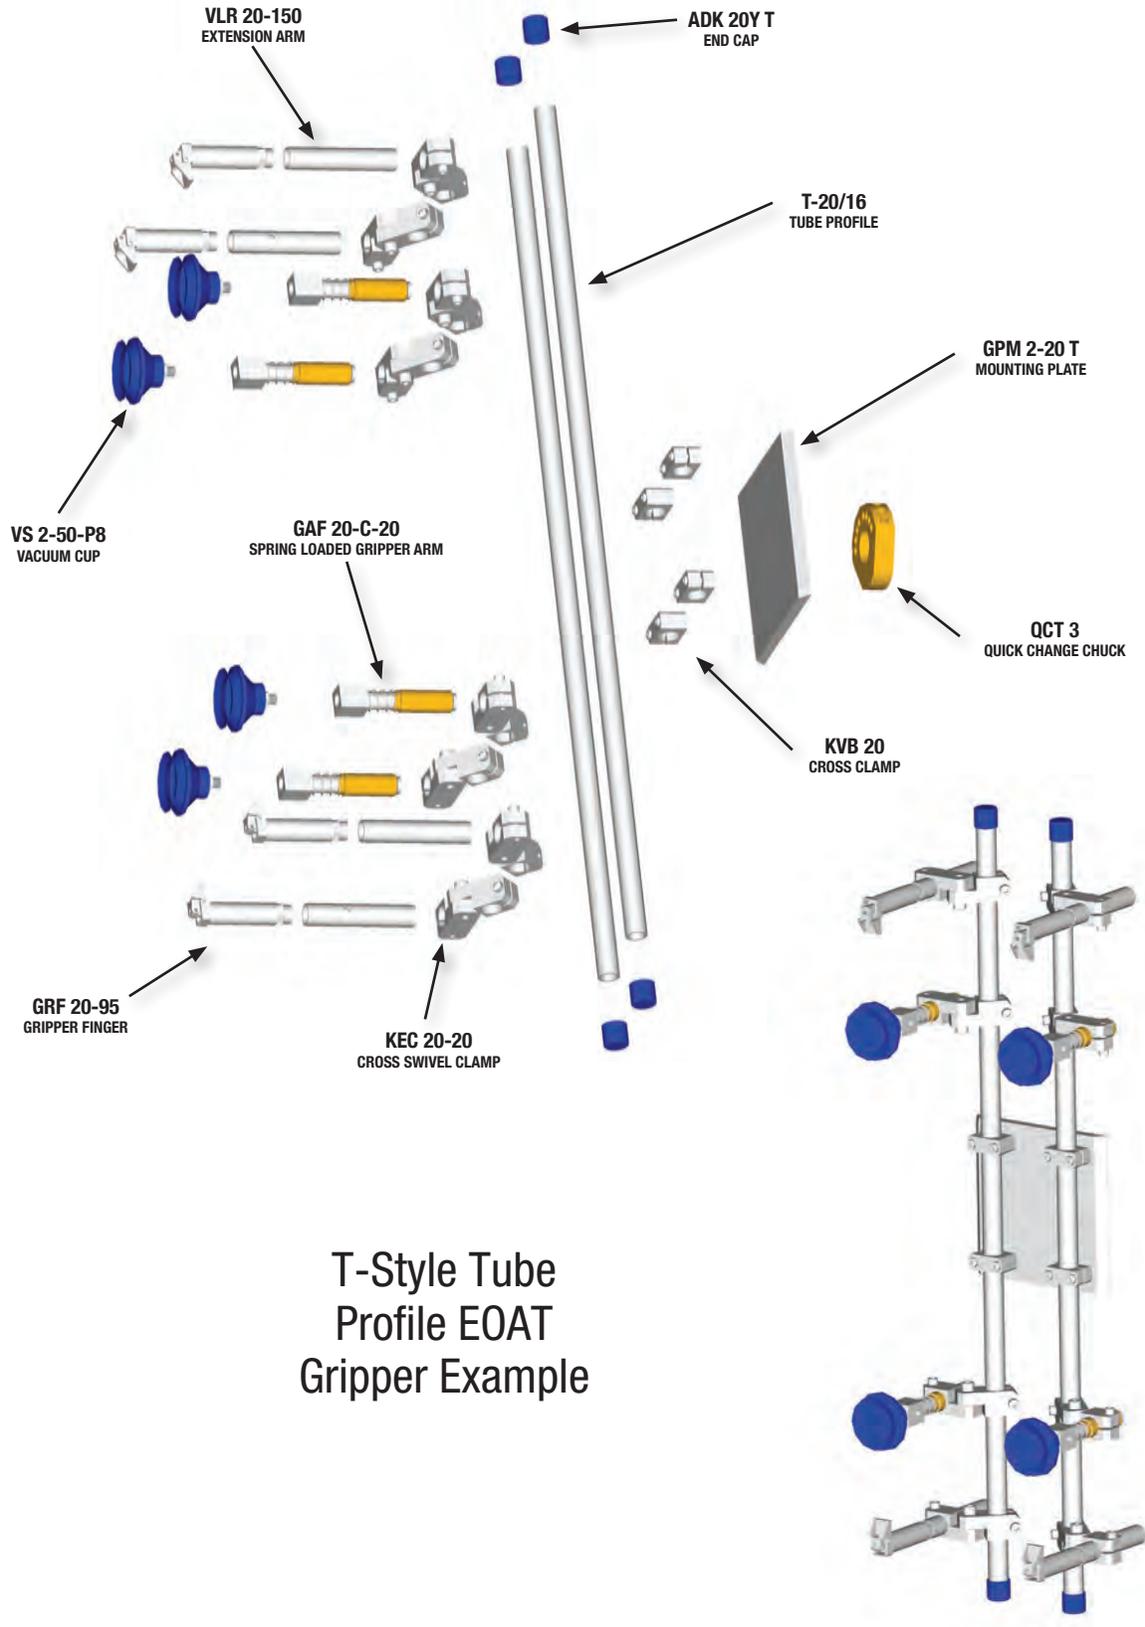

**Low Profile Robust Part Gripper**

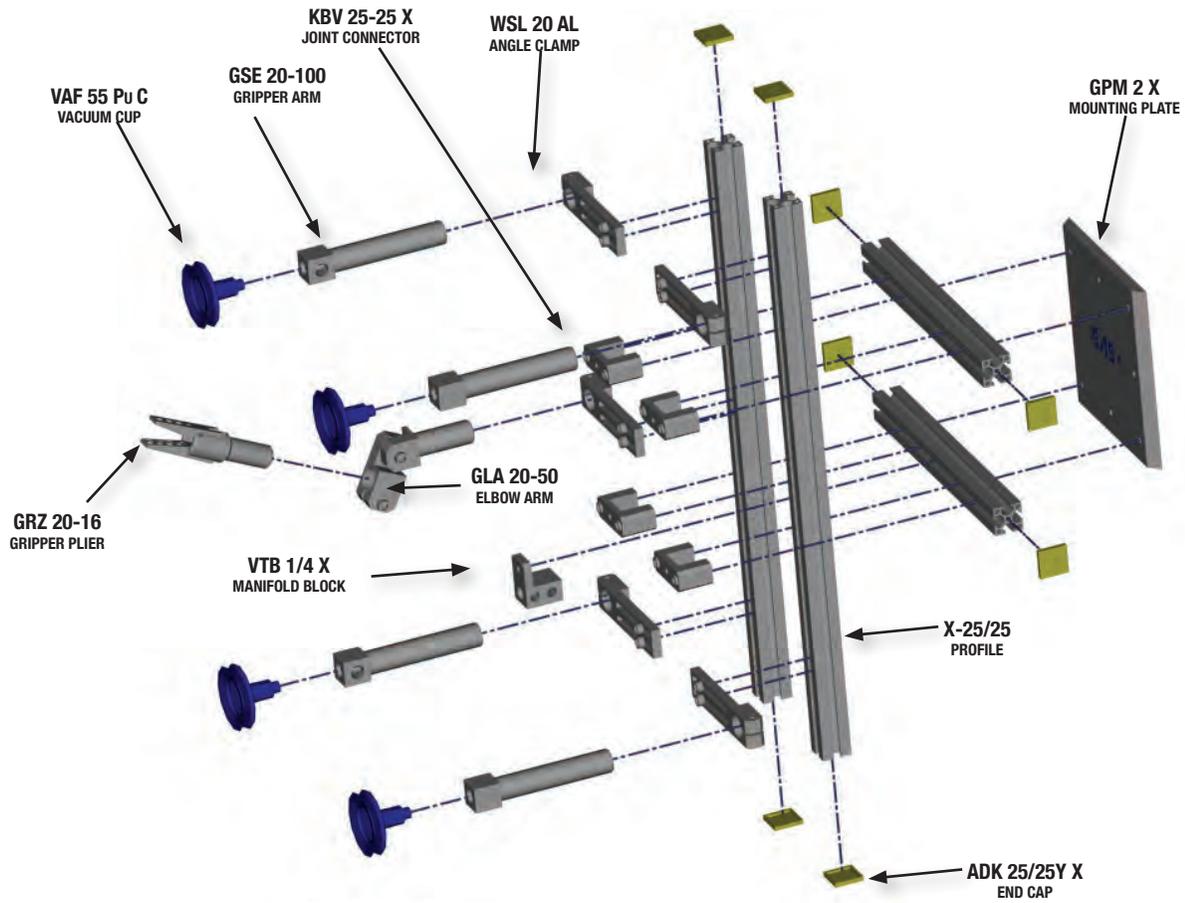

**Punch Press Degater w/ Interchangeable Part Nests and Heated Cutting Steel.**

## Integrator Support

Integration

自動ロボッ

SAS Automation is recognized as a leader in the support of integration companies providing the tooling and equipment required by the most demanding customers. SAS has experienced technicians who can provide on-going support and equipment maintenance. SAS also employs qualified designers who have the expertise to develop equipment that will meet the current and future needs of your manufacturing environment. SAS makes precision EOAT custom components and sub-assemblies using its own patented modular component-based end-of-arm tooling system.

SAS is a recognized partner with KUKA and Motoman and can integrate with virtually any make of robot, globally.

### SAS Benefits:

- End-of-Arm Tooling expertise
- Automation Simulation (3D)
- Installation and operator training
- RFID technology
- On-site service
- Full warranty
- Complete documentation and maintenance manuals
- Alternative manual procedures (recovery)
- Testing
- Automatic and semi-automatic experience
- Safety
- Experience
- Spare parts and components in-stock

## On-Site Service & Installation

- **In a hurry?**
  - **Need more help on-site?**
  - **Require training or installation in your plant?**
  - **Will a technical sales and review call help?**
- .....or maybe “all of the above”**

Just call, and one of the SAS Service fleet of vehicles will come to your door with a single phone call. SAS can solve one of the most common problems associated with building End-of-Arm Tools: having what you need to build that special tool on-site and on-time.

The SAS service van is equipped with thousands of parts. You can build your own EOAT, and we can even train you to build an EOAT on site.

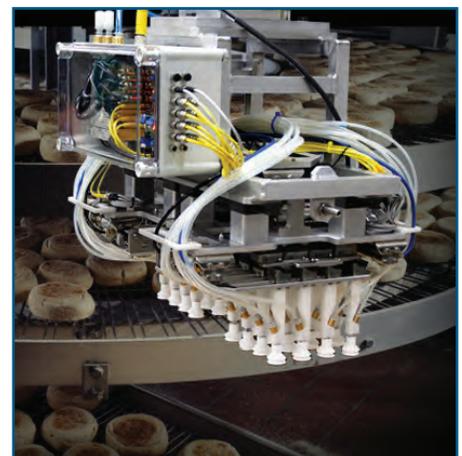

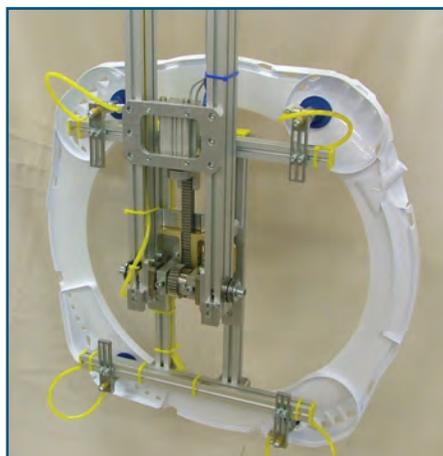

Make your start-up easier: For a “turn-key” project, SAS will design, build, transport, and install your finished EOAT in your plant.

Whether your needs are to handle automotive bumpers, electrical connectors, metal wheels, or pallets, SAS will put the necessary components on the road to service you.

Only SAS provides this comprehensive service for Robotic End-of-Arm Tooling!

The following is just one example (actual quote) of how the SAS traveling service team contributed to a successful launch of multiple tools for a major automotive supplier:

“It is rare that a vendor has the foresight and flexibility to assess and then provide the necessary support during the high level of activity and emotion that often encompass a program launch..... Your placement of the SAS Installation Van directly at our plant, equipped with an array of components and the technical guidance of your sales executive so that our engineers could quickly build end-of-arm tools on-site, was brilliant and critical to a successful launch.”

## SAS AUTOMATION, LLC: Standard Terms and Conditions of Sale June 2008:

All goods and services supplied by SAS Automation, LLC ("SAS") are expressly conditioned on Buyer's assent to the following Standard Terms and Conditions of Sale, including any such Terms which are additional to or different from the terms of Buyer's order or any other documents submitted by Buyer to SAS. In the event that quotations, purchase orders, order acceptances, sales forms, and/or verbal expressions are used which contain terms which are in addition to, different from or inconsistent with those in these Standard Terms of Sale, the Standard Terms and Conditions of Sale shall be controlling, and any such additional, different or inconsistent terms and conditions shall be inapplicable and are hereby objected to. Receipt and acceptance by Buyer of goods supplied by SAS shall constitute acceptance and assent by Buyer of these Terms, even though such acceptance and assent is not limited to the Standard Terms and Conditions of Sale are subject to change by SAS without notice.

1. SAS reserves the right to modify or discontinue the sale of any of its products or services and to modify prices or specifications of its products or services at any time, without notice, and without obligation to Buyer. SAS shall not be liable for any damages caused by its method of processing orders for goods or services or its failure to process orders for discontinued goods and/or services.

2. Minimum Order: SAS requires a minimum order of \$25.00.

3. Purchase Orders: Verbal purchase orders are accepted from current customers with an acceptable payment history on stock items only. Written purchase orders are required for specialty or build-to-order items, or where non-stock purchases are necessary, unless the order is being paid for in advance by credit card. Written purchase orders may be faxed or sent electronically as pdf documents to SAS. All orders are subject to acceptance by SAS.

4. Credit Limits and Credit Approval: New customers are subject to credit limits of \$5,000.00 for components and stock items, and \$10,000 for End-of-Arm Tooling (EOAT) orders, unless the order is paid for in advance by credit card. New customers must complete a SAS credit application to facilitate future purchases.

A Buyer may qualify, at SAS's sole discretion, as a SAS Credit-Approved Buyer upon satisfactory completion of a new customer form, via fax or telephone, plus faxed copy of satisfactory company credit references and bank information. A SAS Credit-Approved Buyer may have an individual credit limit higher than the amounts stated above.

5. Payments: Subject to the down payment provisions and other limitations set forth in these Standard Terms of Sale, payment for goods and/or services purchased shall be due and payable to SAS Automation, LLC in U.S. dollars thirty (30) days from the date of invoice. Buyer shall pay SAS interest on all past due amounts at the rate of 18% per annum or the highest lawful rate, whichever is lower. SAS will be entitled to recover all costs involved in collection including, but not limited to, reasonable attorney fees. If SAS reasonably deems itself insecure, payment for goods and/or services purchased by Buyer shall be due and payable prior to shipment by SAS. Buyer does hereby grant to SAS a security interest in the goods sold by SAS to Buyer as security for the payment for the goods and/or services. Buyer hereby authorizes SAS to file appropriate financing statements as may be necessary under the Uniform Commercial Code ("UCC") to perfect and continue the security interest granted SAS by Buyer in the goods until such time as SAS has received full payment for the goods and/or services. Buyer shall make certain that (i) all goods sold by SAS to Buyer retain their personal property character in order not to be characterized as fixtures and (ii) if any such goods are placed on any real property subject to any mortgage, lien or encumbrance, such goods shall be expressly excluded from the terms of such mortgage, lien or encumbrance. Within thirty (30) days from the date SAS receives payment in full for the goods and/or services, SAS shall release or cause to be released any UCC financing statement that SAS and/or any supplier of SAS has and/or have filed against SAS or Buyer covering the goods.

6. Down Payments: A down payment is required for all orders over \$10,000 for EOATs, special machines, and for all build-to-order products or equipment. Terms granted will be based on potential risk incurred by SAS Automation, LLC, client credit status, and past performance to payment terms.

7. Shipping, Handling and Taxes: All shipping and handling charges are pre-paid and added to the invoice price unless otherwise agreed between SAS and Buyer.

All prices are F.O.B. SAS Automation plant, Xenia, Ohio, USA. SAS prices do not include export boxing or crating for overseas shipment, sales, excise, use, gross receipts, turnover and value added or similar taxes, tariffs, duties, levies or charges and Buyer agrees to pay and absorb the same in full. All licenses and permits, whether federal, state or local, or those of a foreign government, shall be secured by Buyer at Buyer's expense. Additional costs to modify any products in order to comply with federal, state or other governmental laws, regulations or interpretations, adopted or published subsequent to the acceptance by SAS of any order shall be borne by Buyer.

Handling charges, in addition to freight charges are as follows: \$4.95 per order for Component Orders, \$15.00 per tool for End-of-Arm Tooling (EOAT) orders, and \$45.00 per pallet for Palletized Orders. The cost of any special packing, such as crates, or special handling deemed necessary by SAS or caused by Buyer's requirement or requests shall be added to the amount of the order.

No claim for shipment shortages will be allowed unless made in writing within twenty (20) days from the date of delivery by SAS to Buyer. Claims for delay in delivery or products lost in transit shall be made by Buyer on the carrier, as SAS's responsibility ceases, and title and risk of loss passes to Buyer on delivery to the carrier.

8. Discount Program: SAS offers customers a 5% discount on most single orders greater than \$5,000, and a 10% discount on most single orders greater than \$10,000, as determined by SAS. No discounts are offered on EOAT products or services performed at the customer's site. Key Accounts and OEM discounts may also be available, but must be approved in writing by the Accounting Manager and the General Manager of SAS.

9. Price Guarantee: SAS will match any competitor's prices for stock components with proper verification. The proper verification must contain sufficient details for SAS to determine that the competitor's goods are the equivalent of the SAS product.

10. On-Site Service and Installation: Service and installation costs will be billed at \$125/hour for on-site services and at \$55/hour for travel time. A minimum of 4 hours/day will be billed. If the total of travel and on-site hours for any particular day exceeds 8 hours, or if it includes weekend hours or holiday hours, the on-site rate will be \$155/hour for that day; the rate for travel time will remain at \$55/hour. All costs associated with travel including meals, lodging, airfare, car rental, taxi, mileage, etc. will be billed to and paid by the customer.

11. Limited Warranty: Stock SAS products are warranted against defects in workmanship and materials for a limited period of ninety (90) days from the date of delivery by SAS to Buyer, excluding consumable items, such as vacuum cups, which are warranted against defects in workmanship and materials for a limited period of thirty (30) days from the date of delivery. EOAT products and machines, and other specialty machines and built-to-order products are warranted against defects in workmanship and materials for a limited period of six (6) months from the date of delivery. SAS's liability under this warranty shall be limited to repairing or replacing, at the option of SAS, any goods found by SAS upon inspection to be defective or nonconforming. Notwithstanding the foregoing, any replacement parts for EOAT products and machines, or for other specialty machines and built-to-order products, shall be limited to parts which, in the aggregate, cost no more than twenty-five percent (25%) or the original price of the product/equipment, to a maximum of \$1,000.00 (unless otherwise negotiated at the time of sale). This Limited Warranty is void if the defect in or failure of the product is the result of accident, abuse or improper use by the Buyer, or if attributable to unauthorized maintenance or repair.

EXCEPT AS EXPRESSLY SET FORTH ABOVE, SAS PRODUCTS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, AND NO OTHER WARRANTIES, EITHER EXPRESSED OR IMPLIED ARE MADE WITH RESPECT TO THE PRODUCTS OR SERVICES PROVIDED BY SAS, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE OR NON-INFRINGEMENT OR ANY OTHER WARRANTIES THAT MAY ARISE FROM USAGE OF TRADE OR COURSE OF DEALING.

IN NO EVENT SHALL SAS BE LIABLE TO BUYER OR ANY THIRD PARTY FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES (SUCH AS LOST PROFITS OR SALES) ARISING FROM ANY CLAIM WHATSOEVER, INCLUDING ANY TORT, NEGLIGENCE OR STRICT LIABILITY CLAIM, THE LIABILITY OF SAS FOR ANY SUCH CLAIM BEING LIMITED TO THE PURCHASE PRICE OF THE PRODUCT IN QUESTION. BUYER WAIVES ANY CLAIM AGAINST SAS FOR PUNITIVE OR EXEMPLARY DAMAGES. UNLESS OTHERWISE EXPRESSLY PROVIDED HEREIN, ANY LEGAL ACTION ARISING FROM OR IN CONNECTION WITH ANY DEFECT OR FAILURE IN ANY GOODS PROVIDED BY SAS, OR THE PERFORMANCE OR NONPERFORMANCE OF ANY SERVICES PROVIDED BY SAS, MUST BE BROUGHT WITHIN ONE (1) YEAR AFTER THE ACCEPTANCE OF SUCH GOODS OR SERVICES BY BUYER.

The Limited Warranty discussed above does not apply to third party products sold by SAS. Such goods may be covered by the manufacturer's warranty, and Buyer acknowledges that its sole remedy with respect to any defects in such third party products and to any other claim, including but not limited to products liability claims, related to the use, performance or non-performance of such products lies with the manufacturer of those goods.

12. Warranty Returns; Returns for Replacement Goods: Buyer must receive written authorization from SAS before returning any products for repair or replacement under warranty. Buyer shall pay to ship the defective product to SAS. SAS will then repair or replace the item, and ship it back to the Buyer at SAS's expense. Should SAS inadvertently ship the wrong goods to Buyer the Buyer should contact SAS to arrange for return of those goods for replacement with the correct goods. Risk of loss for all repaired or replacement goods shall transfer to Buyer upon delivery to the carrier at the SAS Automation plant, Xenia, Ohio, USA.

If examination and testing reveals that a product returned under warranty is not defective, SAS will return the product to the Buyer at the Buyer's expense.

13. Other Returns: Unwanted stock products and products from third parties can only be returned within thirty (30) days of the date of delivery by SAS to Buyer. Returns of stock products are subject to a fifteen percent (15%) restocking charge; returns of third party products are subject to a thirty percent (30%) restocking charge. Returns will only be accepted by SAS if SAS determines, in its sole judgment, that the goods are in re-saleable condition. The Buyer is responsible for any costs involved in shipping returned goods to SAS, and shall likewise be responsible for any shipping charges involved in shipping unacceptable returned goods back to the Buyer. No returns will be accepted after the thirty (30) day period has expired.

Any EOAT products, specialty machinery or build-to-order products/equipment may only be returned with approval by the General Manager or Engineering Manager of SAS. SAS Automation will inspect the returned items for reusable parts, and will credit the Buyer's account for the cost of any parts that can be restocked, less a thirty percent (30%) restocking fee.

14. Warning: All SAS products and components are designed to provide robotics system experts with options for system development. Before integrating any SAS product or component (or any third-party product resold by SAS) into any robotic system, system experts must assure user safety by determining that each product or component is compatible with the system. This determination can usually only be made through testing, training and a thorough safety evaluation. SERIOUS BODILY INJURY OR PROPERTY DAMAGE MAY RESULT FROM IMPROPER SELECTION, USE OR MAINTENANCE OF SAS PRODUCTS OR COMPONENTS (OR ANY THIRD-PARTY PRODUCT RESOLD BY SAS).

It is the Buyer's sole responsibility to ensure that: (a) adequate safety evaluations and precautions are made before any SAS product or component (or any third-party product resold by SAS) is integrated into any robotic system, (b) each system containing SAS products or components (or any third-party product resold by SAS) is safe for its intended use, and is used safely; and (c) system users are properly skilled, adequately trained, and given appropriate safety warnings.

15. Force Majeure: SAS shall not be liable to Buyer for any delay or failure in performance hereunder due to fires, strikes, other labor disputes, embargoes, requirements imposed by government regulations, civil or military authorities, acts of god, the public enemy, delay in transportation, material shortages or other causes which are beyond the reasonable control of SAS Automation, whether similar or dissimilar to any of the foregoing.

16. Buyer's Specifications Infringement. Where any product is manufactured from patterns, plans, drawings, designs or specifications furnished by Buyer, Buyer shall indemnify SAS against and save SAS harmless from all loss, damage and expense arising out of any suit or claim against SAS for infringement of any patent, trademark, copyright or other intellectual property right because of SAS's manufacture of such product or because of the use or sale of such product by any person. Upon SAS's request, Buyer shall appear in and assume the defense of any such litigation on behalf of SAS.

17. Governing Law: This document and the sale of all goods and services shall be governed by and construed in accordance with, and all claims related thereto shall be resolved under, the laws of the State of Ohio, USA exclusive of its rules on conflict of laws. By placing an order with SAS, you agree that any action or proceeding arising out of such order, the goods purchased from SAS, or otherwise from your relationship and dealings with SAS must be brought in the state or federal courts located in Montgomery County, Ohio, USA and you hereby consent to the exclusive personal jurisdiction of such courts.
